KAVIAR TECH ANNOUNCES NEW AUGMENTED REALITY TOOL : **SNEWPAR**

With millions of people working remotely because of the global pandemic, the AR tech company allows brands to make view live new products in augmented reality like a meeting room with a smartphone.

SnewpAR is a web remote solution and mobile app for instantly presenting products in augmented reality.

with this tool, you can show your own products to worldwide. You can made an AR presentation without need to be near your team.

SnewpAR save time and ressources, and lets you connect with your customers or collaborators in a whole new way. Increase your sales by presenting products in AR without being in same place.

Create an immersive experience and showcase your products to anyone, anywhere.

FIND A REAL
UNITY OF
PLACE

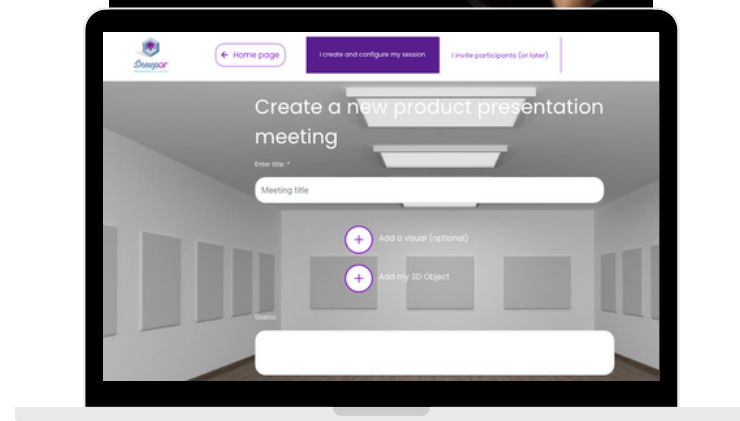

You can create a product launch or product demonstration, or yet your poc-concept, without having it physically and do it anywhere, as long as you have an internet connection.

Our app display your product in front of people who can see it with their smartphone or tablet from home also they can comment and give their feedback about the product show.

"**SnewpAR** is a simple and engaging way to show off your innovations.

Create virtual demonstrations in few seconds, get feedback from your team or your customers, and make a right impression."

KaviAR Tech create many augmented reality solutions, a real AR usecase factory. **KaviAR Tech** focuses on the real needs of users and develops DIY solutions that meet the expectations of the greatest number. During the first containment, **KaviAR Tech** launch *KaviAR Gate*, an augmented reality portal travel free app, but also *Kaviar Holo* : to transform simple message in web AR hologram...

*Are you ready for the
tomorrow's web ? Yes we AR'*
