

Experience shaped during the last 50 years

Mecaplast has been offering its solutions in the plastic injection field for more than 40 years. Since its foundation in 1971, our company has been constantly expanding and boosting its activities. Starting 2002, under the leadership of Jean-Marc Jaccottet, we have incorporated new technologies and developed new markets in order to offer competitive and innovative products.

ENGINEERING

design and industrialisation of your projects

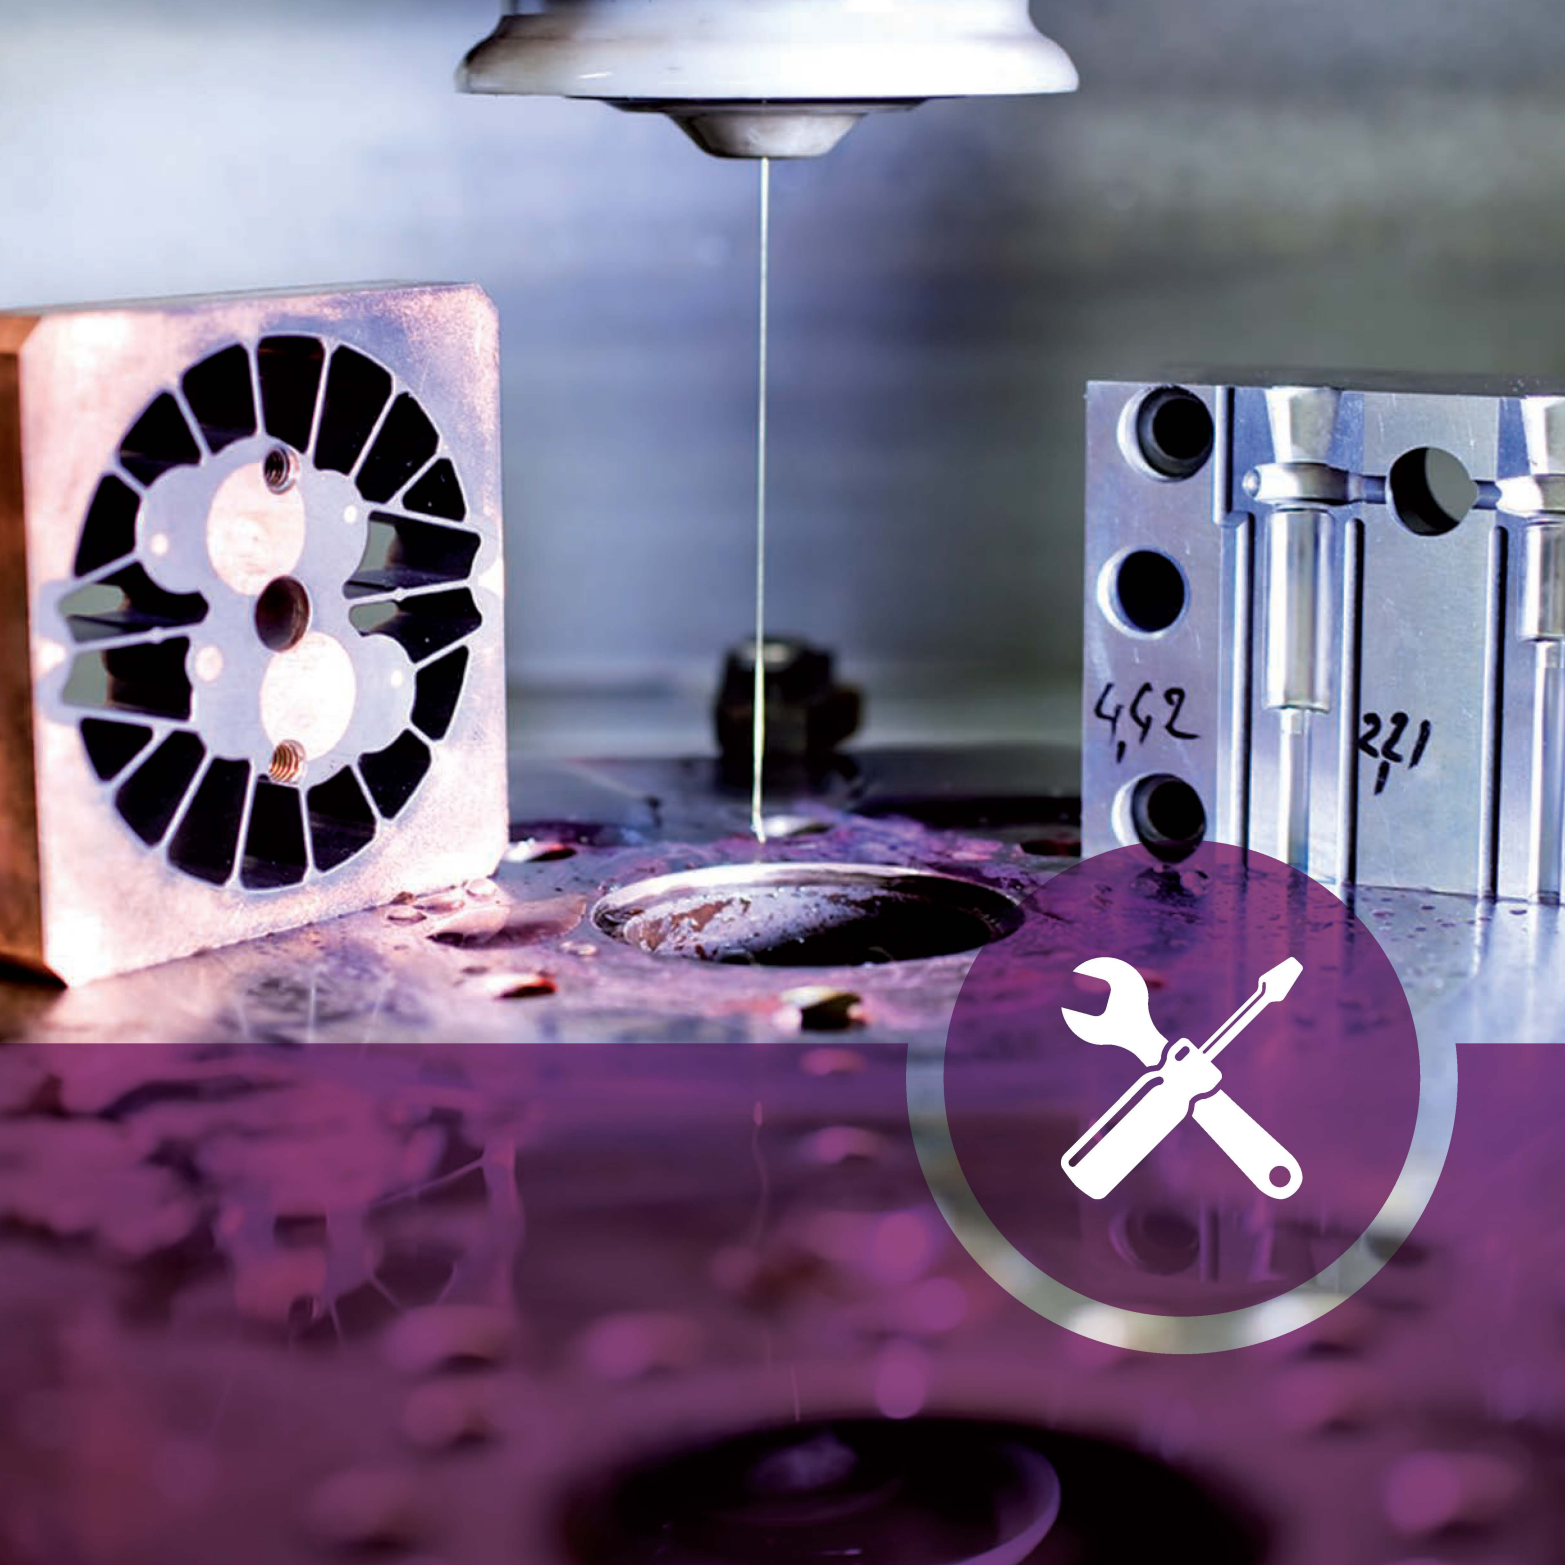

We listen to what you need and take full charge of all your projects, from the design stage until the delivery of your end product. Each request is treated with the **necessary confidentiality**.

The products we manufacture are the result of a close collaboration between our clients and our team of experienced specialists.

You keep available our plastic materials specialists, engineers, manufacturers, mouldmakers, and technical personnel in the plastics processing industry, and we follow a simple and efficient process:

- we **listen** to our client's needs
- we **advise** you on **and develop** your product
- we **create** 3D prototypes
- we **perform** the **mass roll-out**
- we perform the **manufacturing**

MANUFACTURING

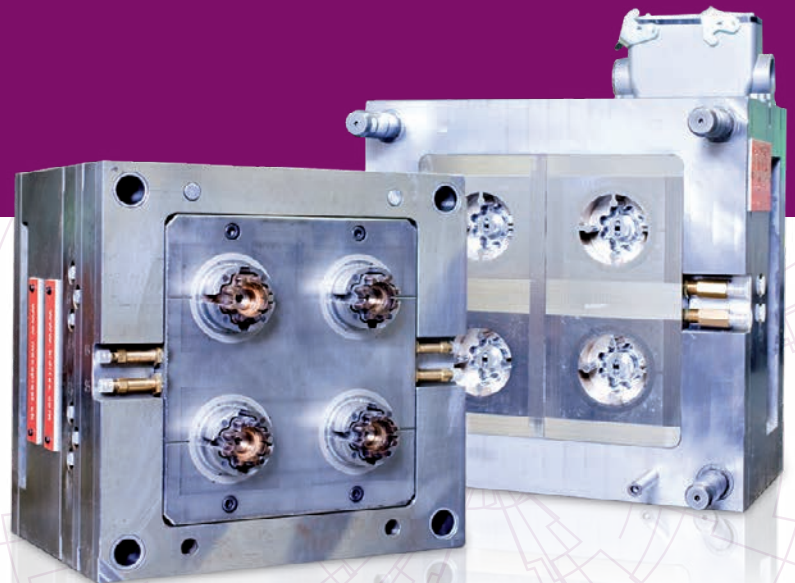

moulds & equipment

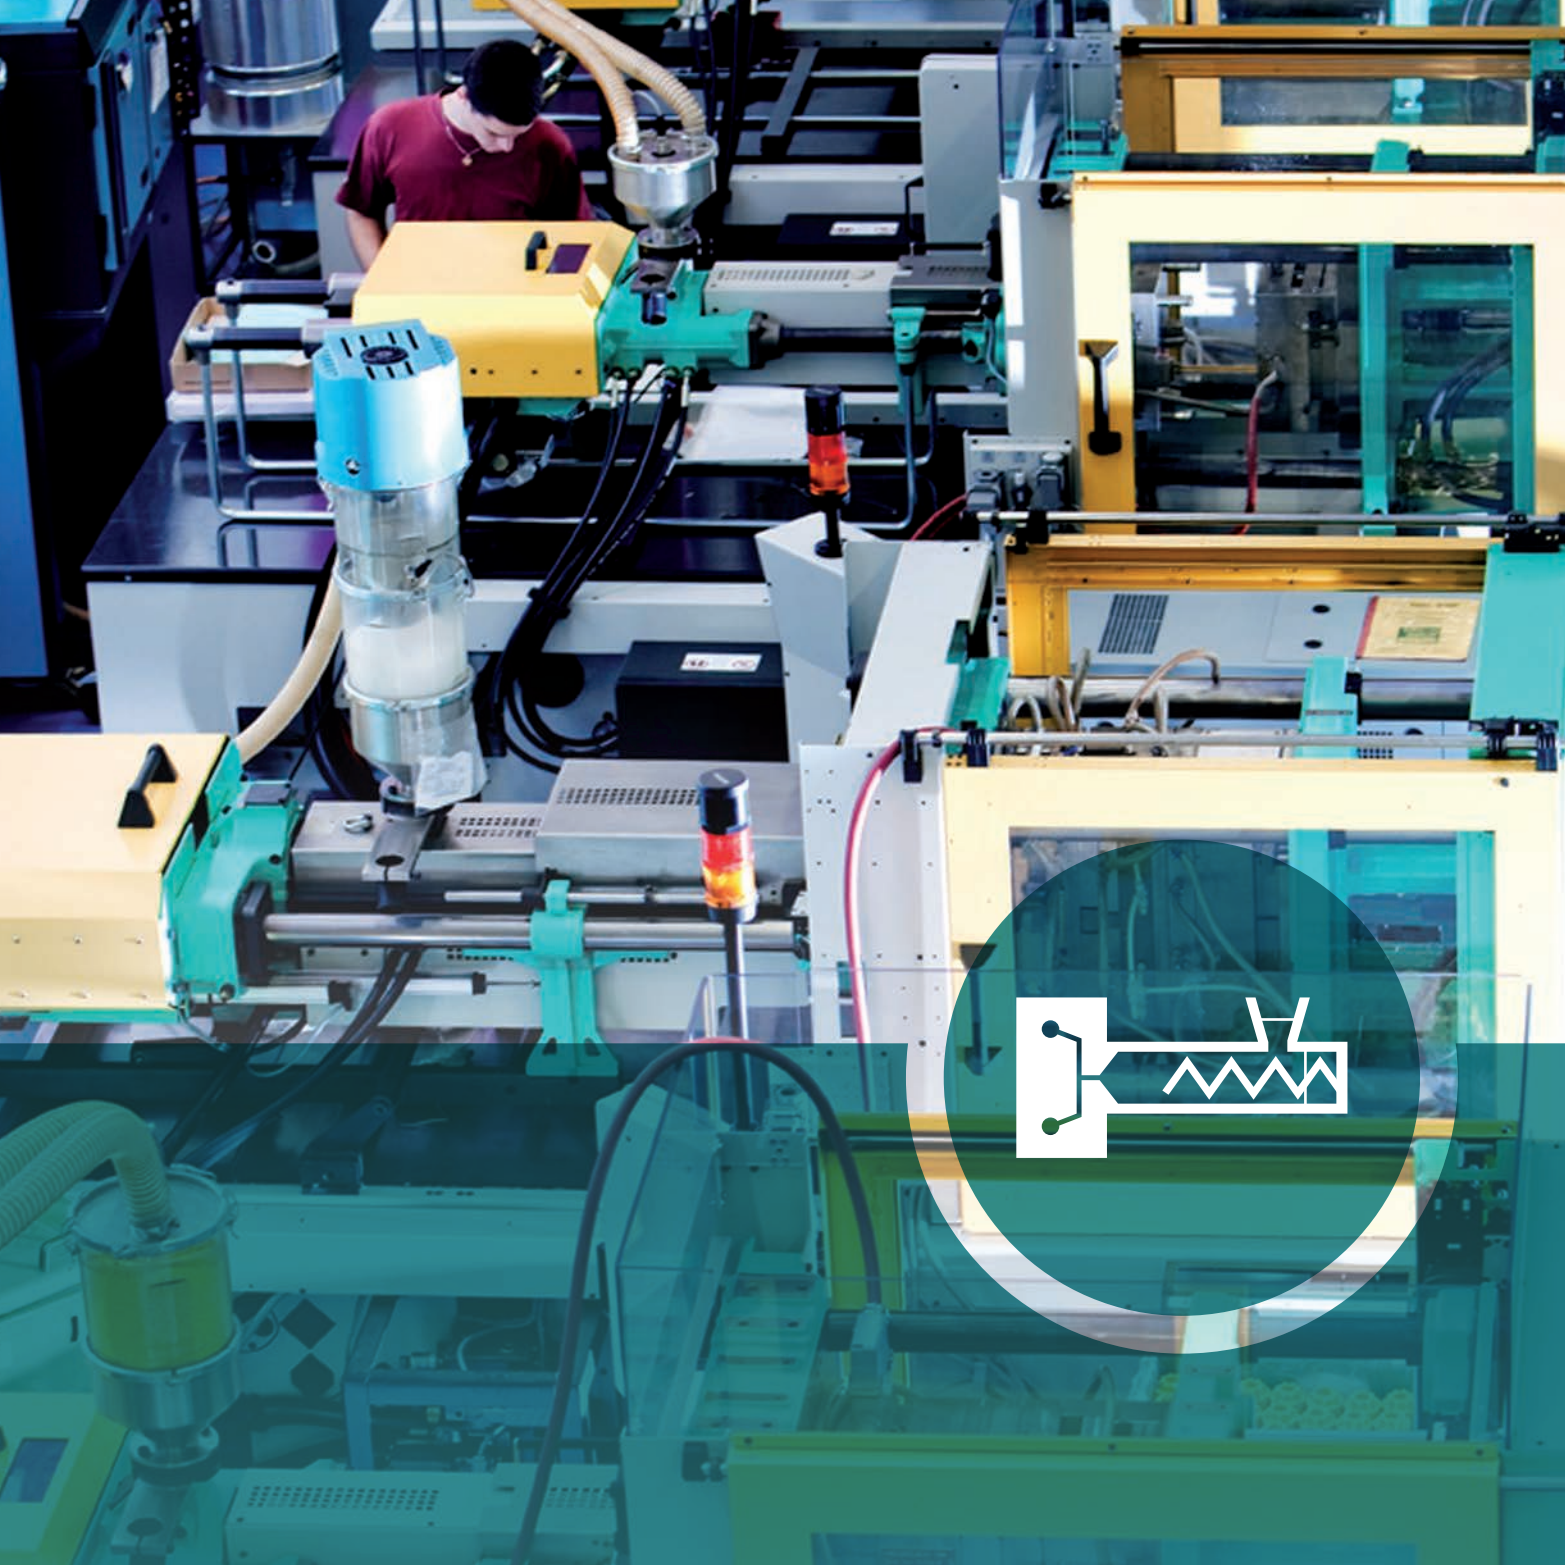

The moulds and equipment are manufactured in our workshop by a professional and skilled team.

Thanks to our know-how, combined with cutting-edge technology, we guarantee the best possible production of your equipment.

All of our manufacturing processes are optimised for computer-aided design and manufacturing (CAD/CAM),
and our machine base includes,
amongst others:

- wire erosion machine
- die-sink erosion machine
- CNC milling machine
- CNC lathe
- grinder

PRODUCTION

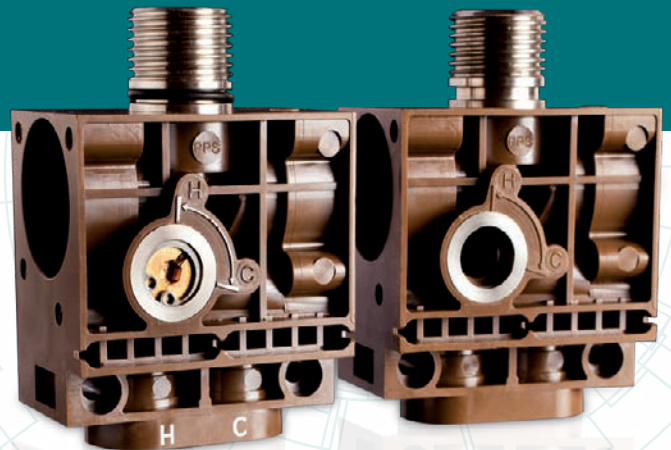

plastic injection sector

Our industrial and medical production unit meets your requirements in terms of plastic injection. We also offer complete solutions for the assembly and installation of the components.

We can manufacture workpieces of various sizes and weights, from 0.01 grams to 2,200 grams.

Our machine base, consisting of 15 to 500 tons injection moulding machines, allow us to transform all kinds of thermoplastic materials:

- **Basic thermoplastics**
(PS, PP, PE)
- **Technical thermoplastics**
(PA, POM, ABS, PC, etc.)
- **High performance thermoplastics**
(PPS, PEEK, PSU, PKU, LCP, etc.)

PRODUCTION

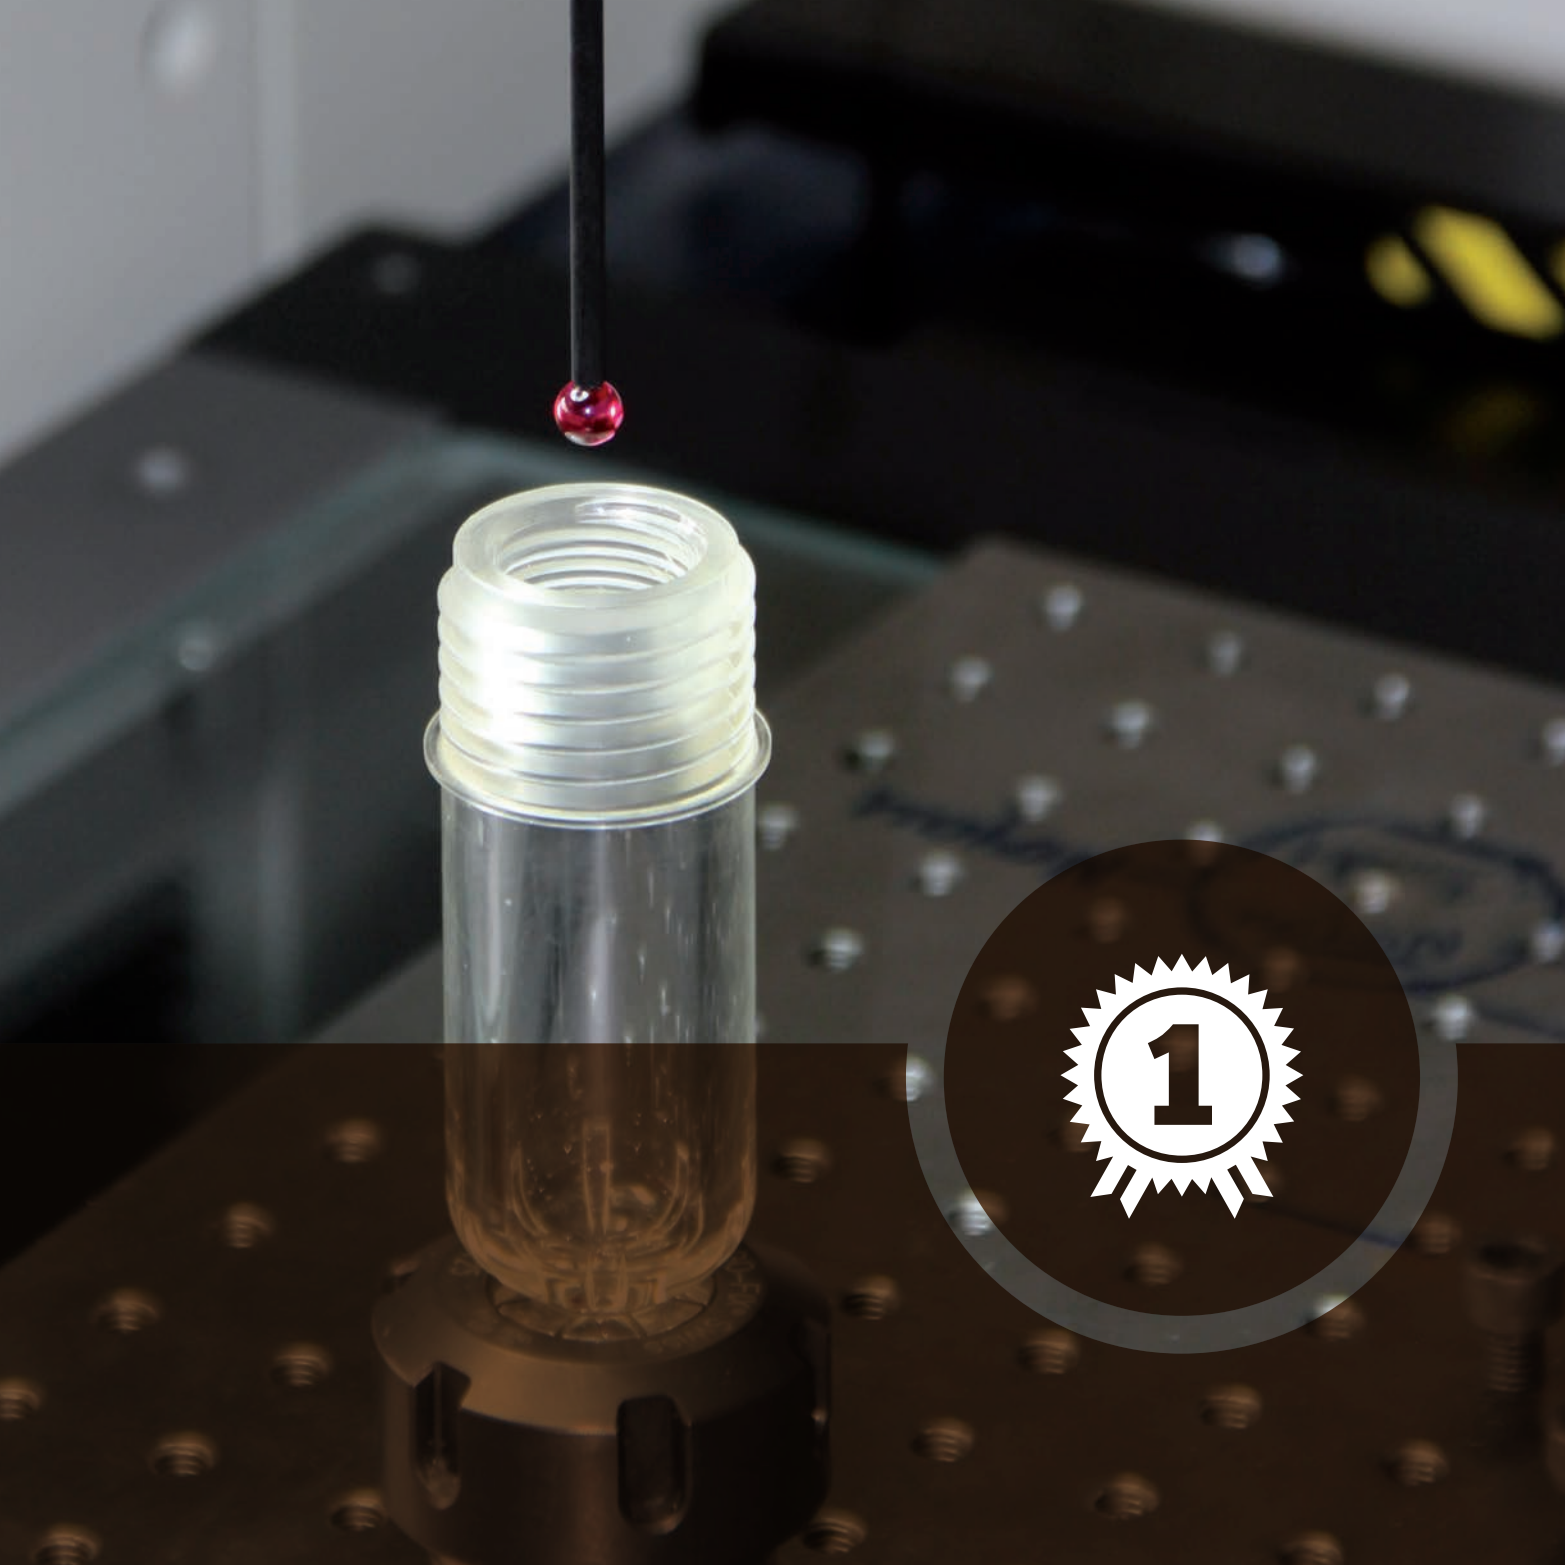

medical sector

To meet the needs of the medical and pharmaceutical sectors, we have a **class ISO 7**, ISO 14644 certified facility dedicated to plastic injection in cleanroom.

According to your specific needs, we will take care of the entire manufacturing process, so that you will receive the medical devices ready to be sold to your customers. We also take care of the assembly of all the components, and of their packaging (blister or double packaging).

These operations require high quality and thorough testing for the application of the **ISO 13485** standard. This is why our medical sector department employs a specialised and highly qualified staff.

1

QUALITY

compliance with the standards

Our **“Quality Assurance (QA)”** and **“Quality Control (QC)”** departments are specifically equipped with all the testing means necessary to perform the qualifications and inspections of our products.

For the sale of certain products, the CE marking is required. Our Quality Department specialists provide you with advice and solutions to obtain the CE marking.

Mecaplast is **ISO 9001** and **ISO 13485** certified.

SWISS
MADE 

Our customers push us to always outdo ourselves

We owe our success to the expertise of the specialists who make up our team. They are constantly seeking to outdo themselves and to produce the highest quality products, in order to meet all the specific requests and needs of our customers.

For us, you are the centre of our attention. From the design of your project until the delivery of your end product, our experts work hand in hand with you and employ all the necessary means for the successful achievement of their engagement. Because your success is our success.
