Outdoor Horse Cow Fly Gadfly Wasp Catcher Trap Control System for Garden Stable

Item No: ATPL6956L

Name: Horse fly trap with galvanized support

Material: Plastic

Size: Funnel diameter: 0.95m;

Ball size: thickness: 1mm, diameter: 0.6m

Height above the ground level: 1.9m

Covering area: 10000m²

GW: 20kg

Color: Green

Target pests: Horse fly, gadfly and wasp

Package: 1Pack

Special Features:

1. The ball become warm under the sunshine for long time, and the flies see these objects as potential sources of nutrition (human or larger mammals, such as horses and cows) and thus land on the ball. As soon as they landed on the black ball they will go out for research and try to bite. Because they get nothing, so they will follow their natural behavior and fly away. Because the horse flies can only fly up, so they fly through funnel above the ball, and get into the collect tray finally, from which escape is no longer possible
2. It can also be used for wasps, wasps have the same flying behavior as dazes; also they fly naturally up. Unlike flies, wasps are not attracted to infrared objects, but because of the sweet scents, such as sugar levels. An optional wasp liquid that can be placed in the collecting tray will lock the wasps. Also wasps will enter the trap from below and therefore fly the collect tray. For them, escape is not an option
3. Very easy to install and use anywhere
4. Great for outdoor use: Garden, swimming pool, stables, meadows, terraces and golf courses
5. The metal bracket is the ideal accessory, which is more convenient to use
6. The trap is only effective with the sun. If you would like to have a trap in which you can put attractant. If the sun is not shining and it is used without attractant, it is ineffective. As brakes are not active at night, the ball does not have to work at night
