UV Resistant Anti-Bird Pigeons Spikes Strips for Cat and Small Animals Control for Fence, Railing, Roof and Walls

Item No: ATPL6896L

Name: Bird spikes

Material: Plastic

Size: 43\*4\*3.5cm

Color: Brown

Target pests: Cat, Bird and small animals

Package: 1Pack

#### Special Features:

1. They prevent human intruders, pests, cats and small animals trespassing your yard to protect your property
2. No more garbage and noise on your roof and fence
3. They are very durable, and won't deform under strong sunshine

4. The defender spikes have the function of UV and weather resistance, which doesn't rust or corrode
5. The spikes are super easy to install, and are safe for use on a variety of surfaces, such as fences, walls, gates, sheds, railings, ledges etc

**The advantages of our product:**

1. The new improved product is the second version of our old short product
2. The length of the product is 43cm, fits the requirement of many online sellers, because the requirement on the length is less than 45cm, but the old style product is too short
3. Through our research, the height of spikes is designed into 3.5cm, we received some complains on the old style product, because the spikes are too short, when cat and other small animals steps on the spikes, they feel like scratching an itch, very comfortable, it can't reach the effect of repelling cat, so customers' experience on the old product is not very good
4. The 3.5cm's height is the best, the spikes of our new product are high in two sides, but low in the middle. According to our actual test, when cat and other small animals steps on the spikes, their stomachs will droop, if the spikes in the middle are too high, they will hurt the stomachs of the small animals, it may also cause complains
5. About the mold, because the shape of the bird spikes is high in the two sides, and low in the middle, the difficulty of production is very big, the production technique is so high. The mold fee is relatively bigger, so its cost will be more than the old short style product or the bird spikes in the same height. But the effect of our new product is very great, since we improved the product, we have been delivering almost 100000pcs to our customers each month
6. We have the patent for this new product
