

TECHPOLYMER™

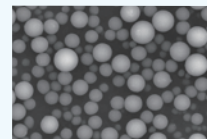

“TECHPOLYMER” is polymer particles developed by suspension polymerization technology. “TECHPOLYMER” is mainly composed of hydrophobic vinyl polymers such as MMA and styrene and it can be used in Various applications.

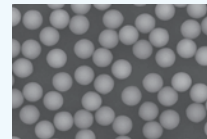

Please feel free to contact us if you have specific requirements on our development.

Product overview

Composition	: Cross-linked acrylic particles, cross-linked polystyrene particles
Particle diameter	: 1.5 μ m ~ 200 μ m
Particle size distribution	: Poly-dispersed, Mono-dispersed
Shape	: Spherical
Product form	: Dry powder

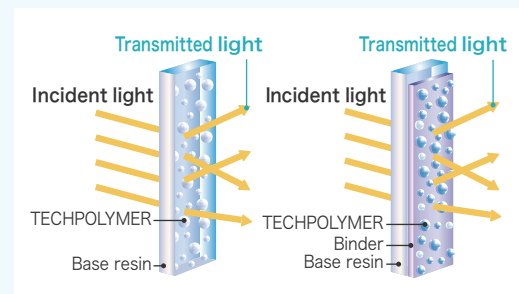

Poly-dispersed

Mono-dispersed

Application example

Optic	: Light diffusion, Light reflection
Paint and Coating	: Matting, Haptic enhancement, Mechanical resistance
Others	: Anti-blocking, Pore-forming, Low permittivity, Spacer, Stress relaxation

*There are more applications where Techpolymer is used

*Data shown in this flyer does not imply any specification nor guaranteed value, but just reference. Please inquire us for more information.
