

NCIC nitrocellulose solution adopt excellent manufacturing process, using high-quality nitrocellulose raw materials. The finished products have high solid content, clear and transparent, no obvious insoluble fiber and other impurities, which are ideal raw materials for the production of high-grade paints and inks.

At present, we have set up NC solution plants in Guangdong and Jiangsu Province, so as to better meet the orders of domestic and foreign customers.

NCIC Nitrocellulose Solution

NC Solution is a kind of easy-to-use mixture made by dissolving NC with solvents at certain formulation.
