D-CARBONIZE

Carbon Cockpit Expert
The most advanced carbon accounting software.

Our solution

The leading carbon accounting software designed for sustainability professionals, CO2 consultants, and auditors. The Carbon Cockpit Expert (CCE) leverages international standards such as Bilan Carbone® and GHG Protocol to measure carbon footprint and curate effective carbon strategies. With the Carbon Cockpit Expert, equip your team with the best tool to internalize carbon accounting practices.

"Turn ambition into action: with the Carbon Cockpit's accurate data."

Grégoire Talbot
Co-founder & CEO

Measure
Measure the carbon footprint of all activities of the company.

Plan
Implement action plans with efficient solutions.

Reduce
Monitor the results of the actions.

Report
Create reports compliant with international standards.

Why choose CCE?

Multi-entity, multi-user, multi-year

Lead a carbon reduction strategy across multiple entities, and over years. Involve colleagues for data collection and share CO2 insights across the organization.

Product & project footprint

Measure GHG emissions per product, service, and project.

Compliant

Measure GHG emissions to comply with GHG Protocol standard and Bilan Carbone® methodology. Define strategies aligned with the Net Zero Initiative and the SBTi.
