

Turn sustainability into a strategic advantage with Sweep

SWEEP

Ensure compliance.
Mitigate risk.
Drive change.

Generate accurate, audit-ready sustainability reports with ease.

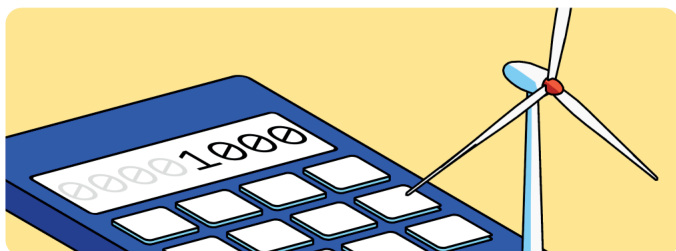

Identify risks and opportunities across your entire business.

Take data-driven action to meet your sustainability goals.

Sustainability data is complex. Managing it shouldn't be.

Companies face mounting pressure to track, disclose, and improve their sustainability performance.

Fragmented data, evolving regulations, and manual reporting processes make it hard to act.

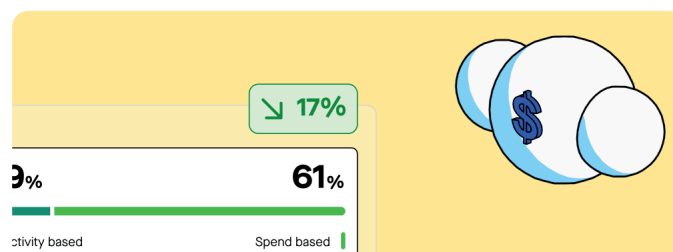

Without the right tools, teams are stuck compiling reports instead of driving sustainable change.

Imagine a world where sustainability data fuels business success.

What if you had a single source of truth for all your ESG data?

What if you could streamline reporting, ensure compliance, and empower your entire organisation to act?

Sweep makes it possible! So you can save time and costs, mitigate risks, and drive sustainable growth.

The world's most ambitious companies trust Sweep

BlackRock.

Track.

Gain full visibility over your sustainability impact

Sweep centralises all your ESG data: carbon, waste, pay gap, and more... So you can track progress with confidence.

- Automated data collection & validation
- Supplier engagement & value chain tracking
- AI-powered data mapping & configuration
- Audit-grade sustainability data

Status

827/1161

582 Approved 292 Reported 173 In progress 12 Rejected 102 Not started

Total emissions

45 861kt

Disclose.

Meet compliance requirements with ease

Generate audit-ready reports aligned with GHG Protocol, CSRD, ISSB, and other disclosure standards, all from one platform.

- Pre-built compliance frameworks
- Customizable reporting templates
- Full data traceability & governance
- Timely private disclosures for investors & auditors

Carbon intensity (tCO2e/sales)

Our carbon emissions in relation to overall sales.

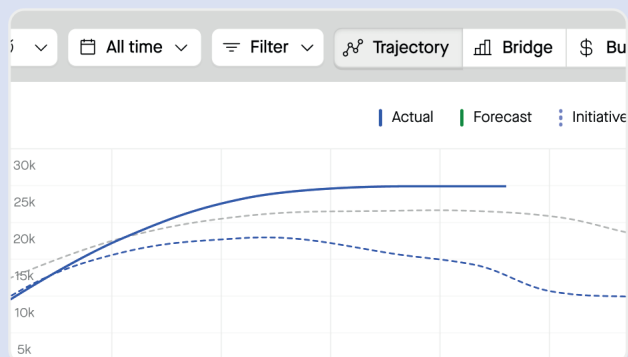

Act.

Turn sustainability insights into business action

Move beyond reporting to drive meaningful change with data-backed decisions.

- Risk and opportunity identification
- Impact mapping and assessment
- Initiative planning & target-setting
- Scenario simulation & impact forecasting
