

Yann Abdelli

International Business Project Manager

Introduction

I am a strategic, results-prover International Business Project Manager with over 27 years of experience in SAP consulting, international training programmes delivery, and project governance in both private and public sectors.

I am specialised in structuring global PMO frameworks, leading consultant teams, and deploying KPI-led governance models to steer SAP and IT rollouts across international environments.

With deep expertise in functional ERP flows (P2P, OTC, Finance, Controlling) and strong fluency in change enablement, I have consistently delivered scalable solutions and their accelerated adoption through training and tailored digital learning.

Certified in SAP S/4 HANA, Salesforce CRM, Agile Scrum Master and Yale's Financial Markets programmes, I combine entrepreneurial insight with an operational rigor to drive measurable impact at scale.

Business Outcomes

- Reduced enablement costs by 50% through automation and shared resources.
- Centralised data and real-time tracking improving oversight and saving time in EMEA. €3M saved through better cost control.
- Process improvement achieving 15% time saving.
- Optimised workforce management, saved 10% in human resource allocation.

Industries

- Optical Manufacturing
- Postal Services
- Defence
- Chemistry - Laboratories
- Media and Communications

Languages

Platforms

- SAP, Salesforce, IFS, JD-Edwards
- Microsoft Copilot, Jira, Agile, Ms Project, Mantis, AzurDevOps

Relevant Experience

YannandCo

Managing Director

August 2024 to present

Certifications to enhance PM skills and optimise tools like JIRA (Agile) and Microsoft Copilot (AI), with training from IBM (PM role), Macquarie University (PM competencies) and ESSEC (Change Management, through internalised and experiential models). Additionally, the roles of Salesforce Sales Ops Specialist and Agile Scrum Master at icSM.

ESSILORLUXOTTICA

International Project Manager

July 2022 to July 2024

Disjointed training processes and siloed workstreams were limiting global tool adoption and slowing down knowledge transfer across regions. I led the international deployment of SAP Enable Now, aligning cross-functional teams, (250 people) managing six consultants, and delivering a 'train the trainer' model across seven countries. With centralised governance and streamlined content creation, **we doubled skills ramp-up speed and reduced enablement costs by 50% through automation and shared resources.**

ESSILORLUXOTTICA

Project PMO for Europe

June 2021 to June 2022

The lack of visibility on the project portfolios caused the Group's electronic reference catalog bottlenecks which hampered resource allocation between teams. I led the implementation of MS Project and ProjectLibre tools across multiple countries, enabling clear tracking of project lifecycles and early identification of resource risks. By **centralising project data and activating real-time monitoring**, we improved task oversight, enhanced accuracy on project status, and **delivered about one third time savings** through simplified, multi-project tracking across the European zone.

LA POSTE

Project Manager-PMO

June 2019 to June 2021

Vehicle and mobile fleet inefficiencies were causing cost overruns, with mismatches between fuel usage and postmen's schedules, inconsistent maintenance standards, and no unified oversight. I led financial optimisation of the mobility systems, managing 65,000 vehicles and 90,000 mobile lines, implementing KPI-driven BI/BW reporting, and overseeing data integration with SAP FICA. This enabled proactive cost forecasting, standardised processes, and tighter control of usage. **The project saved 3 million euros and achieved budget savings of 15%** through the successful transition to a new mobile operator.

Safran Aircraft Engines

PMO

Dec 2017 to June 2018

Lack of reporting visibility and fragmented SD and MRO processes were reducing efficiency and increasing operational risk. I supported the optimisation of SAP flows, providing functional assistance to SD and MRO teams and facilitating clear communication through regular progress reporting. By implementing controls at critical process stages and streamlining user interactions, we **improved process efficiency and achieved a 15% time saving** through risk reduction and better alignment.

Air Liquide

PMO

July 2016 to Nov 2017

Limited English-language training and partial understanding of processes were slowing users' adoption of SAP workflows during a global rollout. I led the creation of targeted training materials, supervised user guides for Accenture consultants, and supported teams across key process areas including MM, PS, PP, SD, FI-CO, and SIS. By organising UAT sessions, updating business procedures, and delivering multilingual support, we **enabled smoother transitions, improved process clarity, and achieved a 10% saving in human resource allocation** through optimised workload management.

Groupe Publicis

PMO

Jan 2016 to June 2016

Cleared IT ticket backlog by importance, urgency and criticality. Assigning 250 tickets to the right experts in 3 weeks, improving communication with sponsors, and **reducing information overload by 38%** for employees and managers.
