Professional Experience

Manager – E-Works-On | Web Agency – Rouen | 2021–2025

- Built projects, web apps and API integrations that improved efficiency and user experience.
- Introduced Agile practices (Scrum, XP, Kanban), cutting delivery cycles.
- Built MVP AI-driven features (chatbots, predictive models), boosting client engagement.
- Coordinated with stakeholders for refining requirements, translations, proofreading, and communication.
- Defined and managed customer budgets, ensuring on-time delivery within cost targets.
- Implemented DevOps pipelines, reducing deployment errors.

Developer – Argon & Co | Supply Chain – Levallois-Perret | 2022–2023

- Developed LDAP/LDAPS authentication applications in C#, strengthening system security and user access control.
- Built an XPO object comparison tool, improving database integrity and developer productivity.
- Collaborated with a 10-member team using Agile Scrum, ensuring timely delivery of software milestones.
- Managed source control and CI/CD pipelines with GitHub and Azure DevOps, reducing integration issues.
- Supported project documentation and knowledge sharing, enhancing cross-team efficiency.

Full-Stack Developer – La Maison des Avocats | Paris | 2021–2022

- Developed Windows and web applications in C#, streamlining legal workflows for the Paris Bar.
- Integrated BNP Bank's Mercanet v2 payment API, enabling secure online transactions.
- Optimized Oracle SQL packages, improving system performance and data reliability.
- Collaborated in a 7-member team using the Waterfall methodology, ensuring project delivery on schedule.
- Managed version control and deployments with GitLab, reducing release errors and downtime.

Co-Founder – L&C Consulting / Sowephone / Alliance Telekom | 2006–2019

- Directed end-to-end project lifecycles (prototyping to deployment) for telecom and software solutions.
- Managed cross-functional teams in development, sales and customer support, scaling operations across multiple markets.
- Published mobile apps on iOS and Android stores, driving hundreds of downloads and recurring subscriptions.
- Designed and executed digital marketing campaigns (SEO, SEA), increasing inbound leads.
- Trained 5+ call center and sales representatives, improving customer satisfaction scores and conversion rates.
- Administered DevOps and SysOps environments (Linux, Windows Server, Asterisk, IIS), ensuring system efficiency.
- Implemented CRM optimization and automation tools, reducing response times by 50% and boosting retention.
- Negotiated partnerships and subscription offers, securing long-term revenue streams and business growth.

Software Engineer – Universal Mobile | Paris | 2003–2005

- Developed intranet applications and APIs in .NET and SQL Server Scripts, streamlining internal workflows.

- Managed data integration projects, improving reporting accuracy and accessibility.
- Oversaw webmaster activities, ensuring reliable website performance and updates.

Study Engineer – Accor Group | Paris | 2002

- Contributed to the Back Office Services System (B.O.S.S.) by developing and integrating .NET modules.
- Enhanced database processes in SQL Server, improving back-office efficiency.

Study Engineer – Cartesis (Business Objects) | Paris | 2001–2002

- Developed and integrated Magnitude web applications using Java, JavaScript, C++ and COM/DCOM.
- Improved financial reporting tools, enhancing data accuracy and decision-making.

Study Engineer – Ticketnet (Ticketmaster) | Paris | 2000–2001

- Built and migrated Amanda ticketing applications from C++ to Visual C++.
- Improved system performance, enabling faster and more reliable event ticketing operations.
