Data exploitation specialist for decision-making processes, with hands-on experience gained during a work-study placement at StenOps, where I contributed to application development for Alstom. I implemented real-time management solutions to optimize procurement processes and enhance organizational performance. Following a career transition from air traffic control, I have successfully transferred my real-time data analysis and fast decision-making skills into the field of Business Intelligence.

Skills & Languages

- **Tools & Technologies:** Qlik Sense, Power BI, Tableau, ETL, SQL, Data Analysis: Reporting, Advanced Statistics, Data Visualization.
- **Air Traffic Control:** Real-time data analysis, complex information flow management, high-pressure decision making.
- French – Upper Intermediate (B2)
- English – Upper Intermediate (B2)
- Arabic – Proficient (C2)
