 HYOSUNG TNC

# From nature to performance fiber

## regenBIO

### HYOSUNG × LENZING

### “From nature to you”

Fibers made from renewable resources,  
performance kept intact.  
Nature-touched, sustainable,  
ready for every move.

## regen™ BIO Spandex

HYOSUNG TNC transitions to sugarcane-based regen™ BIO Spandex

**HYOSUNG TNC is committed to making sustainability seamless**  
— for our partners, for consumers, and for the planet.

#### A New Path to Sustainability

HYOSUNG TNC, the world's leading Spandex producer by market share, is shifting its **regen™ BIO Spandex** feedstock from corn to sugarcane, enabling lower carbon emissions without sacrificing performance.

#### Integrated Supply Chain in Vietnam

For the first time, the industry will have an integrated supply of bio-based Spandex in one region, from raw material to fiber. This means faster market delivery, shorter development times, and a stronger supply chain for partners.

#### Traceability and Transparency

Partnering with Czarnikow (CZ) and their VIVE platform ensures a high level of traceability — from sugarcane farms to fiber production.

#### Transitioning Existing Partners with Flexible Options

HYOSUNG TNC now offers expanded bio-based Spandex options:

#### **regen™ BIO + Spandex, regen™ BIO Max Spandex**

The bio-based content ratio stays consistent across corn and sugarcane feedstocks, making the switch easy for brands.

## ALL ROUND RECOVERY

Functional underwear  
designed for all-day comfort

Soft, luminous base layers that  
blur the line between underwear  
and loungewear—effortless,  
elevated, and skin-friendly.

## Functional Fibers Designed for the Modern Intimate Lifestyle

The intimate apparel market is rapidly evolving, demanding fabrics that combine delicate aesthetics with high-performance functionality. Consumers now expect multi-functional qualities that keep wearers comfortable, fresh, and confident, while maintaining a luxurious hand-feel and vibrant color. HYOSUNG TNC anticipates these needs, showcasing performance fibers that redefine comfort and elegance in next-to-skin garments.

**CREORA**  
Rexy 2

**CREORA® Rexy2 Nylon** offers a luxurious gloss and soft texture, mimicking the sheen of rayon and silk achieved through diffuse reflection from the yarn's special cross-section.

**CREORA**  
EasyFlex

**CREORA® EasyFlex Spandex** offers a soft feel, lasting fit, and size inclusivity. It features high elongation with low power and excellent retention.

A **dyeable version** is also available, ensuring superior color consistency and reduced grin-through.

**CREORA**  
Color+

**CREORA® Color+ Spandex** overcomes the difficulty of dyeing regular spandex blended with nylon and natural fibers. It can be dyed in acid (nylon) and reactive (natural fiber) dyes, allowing deep and vivid colors in everyday fabrics.

## COOLING SENSATION

Long-lasting,  
fresh-feeling underwear

Designed for all-day, all-season  
comfort, cooling underwear  
provides a consistent fresh  
and comfortable feeling  
throughout the day.

## Next-Level Comfort with Cooling Performance

HYOSUNG TNC introduces innovative cooling fibers that regulate body temperature and manage moisture. They keep wearers fresh, dry, and confident, while maintaining the soft touch and lightweight feel of premium intimate apparel.

**CREORA**  
Coolwave

**CREORA® Coolwave Nylon** delivers superior cooling performance thanks to its special hydrophilic polymer within the yarn, which enhances moisture absorption and keeps you comfortable all day.

**CREORA**  
Aqua-X

**CREORA® Aqua-x Nylon** provides instant contact cooling through special minerals and wide yarn cross-sections.
