

BPAMedical365[®]

Smart quality management inside Microsoft 365

Always audit ready
Microsoft-native eQMS enabling efficient compliance and traceable quality processes.

Data sovereignty & control

Your data remains within your Microsoft tenant under your existing policies. GCC High Cloud-ready for top-tier security.

Security by design

Built on Microsoft's enterprise-grade security (access control, audit logs, encryption, MFA powered e-signature).

High user adoption

Intuitive experience on SharePoint and Teams with no disruption to daily work, accessible on any device.

Lower total cost of ownership

No parallel infrastructure, predictable licensing, minimal customization, pre-validated solution.

Quick and standardized rollout

Pre-configured modules for a rapid go live. Client autonomy (no BPA dependency)

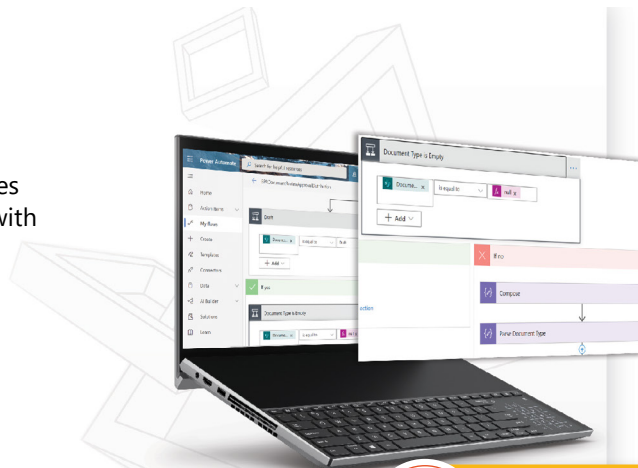

Future-ready platform

Enterprise-grade foundation built on M365, scalable, continuously evolving and AI-ready.

BPAMedical365[®] is an Enterprise Quality Management platform, securely deployed inside your Microsoft 365 tenant, leveraging **SharePoint, Teams, Outlook** and **Power BI**. By combining data sovereignty with high user adoption (including back-office workers) and a standardized project delivery model, the solution ensures predictable costs, rapid time-to-value and compliance with **GxP, ISO, FDA, MDR, 21 CFR Part 11** requirements.

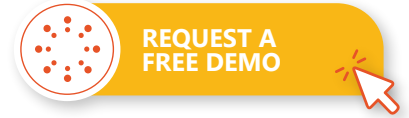

With its **Q-Pilot AI Suite** and **robust prebuilt automation**, the BPA app delivers a high ROI, while reducing manual effort, accelerating workflows and improving compliance efficiency.

By eliminating repetitive tasks and streamlining quality processes, organizations achieve measurable cost savings and reach payback within just a few months.

ACCESS BPA'S VIDEOS

Always be audit-ready

✓

20 integrated eQMS modules
For continuous improvement and full product lifecycle management, BPA includes document control, audits, non-conformances, CAPA, risk and training management, and many more modules.

✓

Prebuilt automated workflows and PowerBI reports
Facilitate compliance with standardized processes and robust e-signatures bringing real-time visibility into compliance status for data-driven decision making.

✓

Report eQMS events at no cost
Clients, employees and other external stakeholders can report events on any device at no extra cost (no need of additional costly portals)

✓

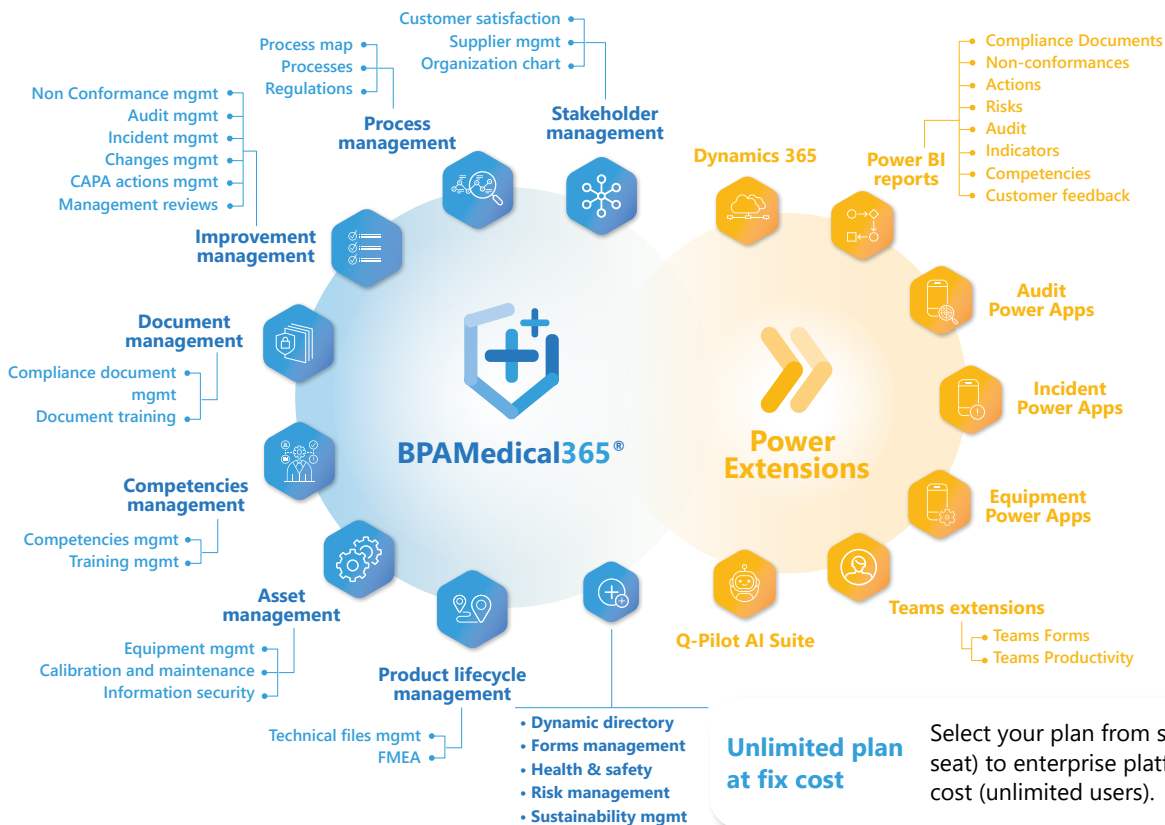

Smart AI use cases
Boost productivity with secure tenant AI agent, for training awareness, continuous audit readiness and audit evidence reports.

✓

Connect with external systems
Seamless integration with Dynamics 365 (Business Central, F&SCM), and other ERP/CRM systems through proven connectors.

✓

Accelerate time to validation
Reduce the total cost of validation with BPA's Validation Toolkit™, a complete set of regulator-ready validation deliverables.

Unlimited plan at fix cost Select your plan from standard (per seat) to enterprise platform at a fix cost (unlimited users).

BPA Medical 365® combines Microsoft 365-native architecture with built-in AI and preconfigured automation to deliver **always audit-ready, fully traceable quality processes**.

Its unique **unlimited enterprise plan** offers fixed pricing for unlimited users, ensuring predictable costs, full data sovereignty, seamless adoption, and scalable deployment. With BPA, transform compliance into an efficient and continuously monitored operational advantage.
