SYNTEGON

You can count on that

6,900

Syntegon employees

1.5 billion

euro annual sales

1,500

service employees

160

years of experience

75,000

solutions installed worldwide

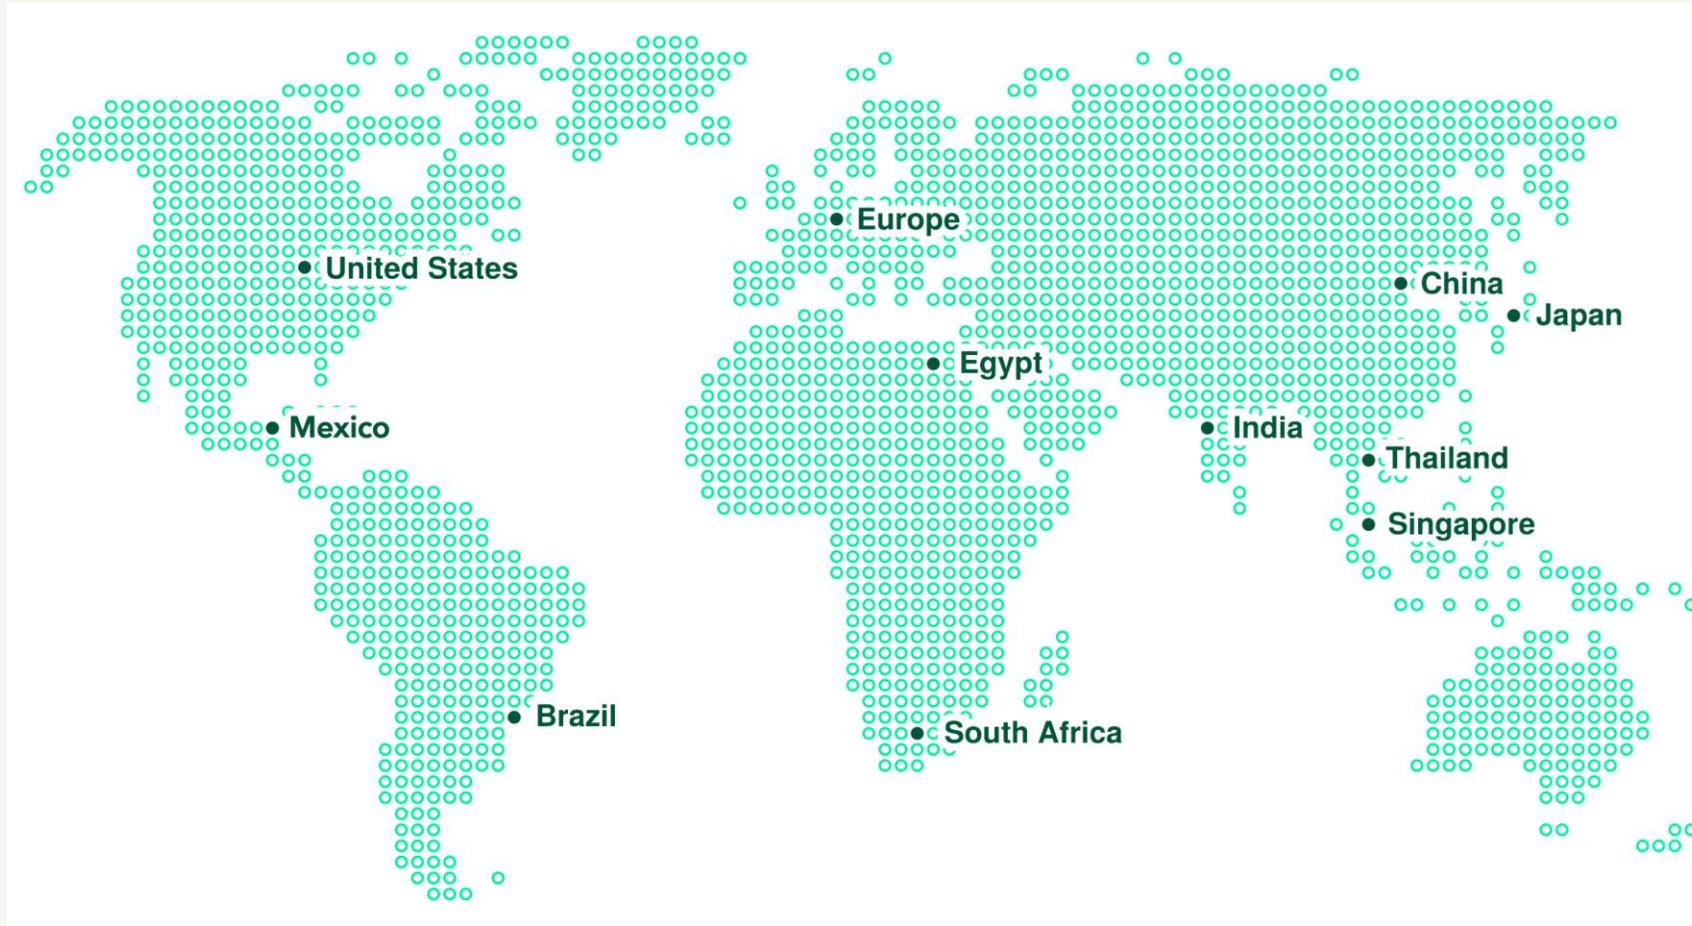

2,000

patents and patent applications

47

locations

Syntegon is always close to its customers - worldwide.

A photograph of two men in a factory setting. The man on the left is older, with grey hair and a beard, wearing a green button-down shirt. He is holding a white tablet. The man on the right is younger, with dark hair and a beard, wearing a white button-down shirt. He is looking at the tablet. The background is a blurred industrial environment.

COCREATE. COSUCCEED.

We partner with our customers to accelerate their growth and build futureproof operations and lasting market leadership. Based on deep industry knowledge, we deliver line solutions and services that span the entire lifecycle.

Customer Promises

Seamless Processes

We help building better businesses

With a deep understanding of our customers businesses and a holistic approach to solutions, we help them unlock their full potential by enhancing productivity and reliability - through greater efficiency, fewer interfaces, and seamless integration of mission-critical processes into their operations.

Innovative Technologies

We enable customers to lead in their markets.

We leverage our deep engineering expertise to make a real difference to our customers' most critical operations - providing them with the most innovative and high-performance technology solutions on the market, that create measurable value and drive competitive advantage.

Sustainable Solutions

We empower future-proof operations

As a strategic partner, we stand alongside our customers to help them master tomorrow's challenges - supporting their sustainability goals, minimizing safety risk, safeguarding product integrity, and delivering services and added value throughout every stage of the system's lifecycle management.

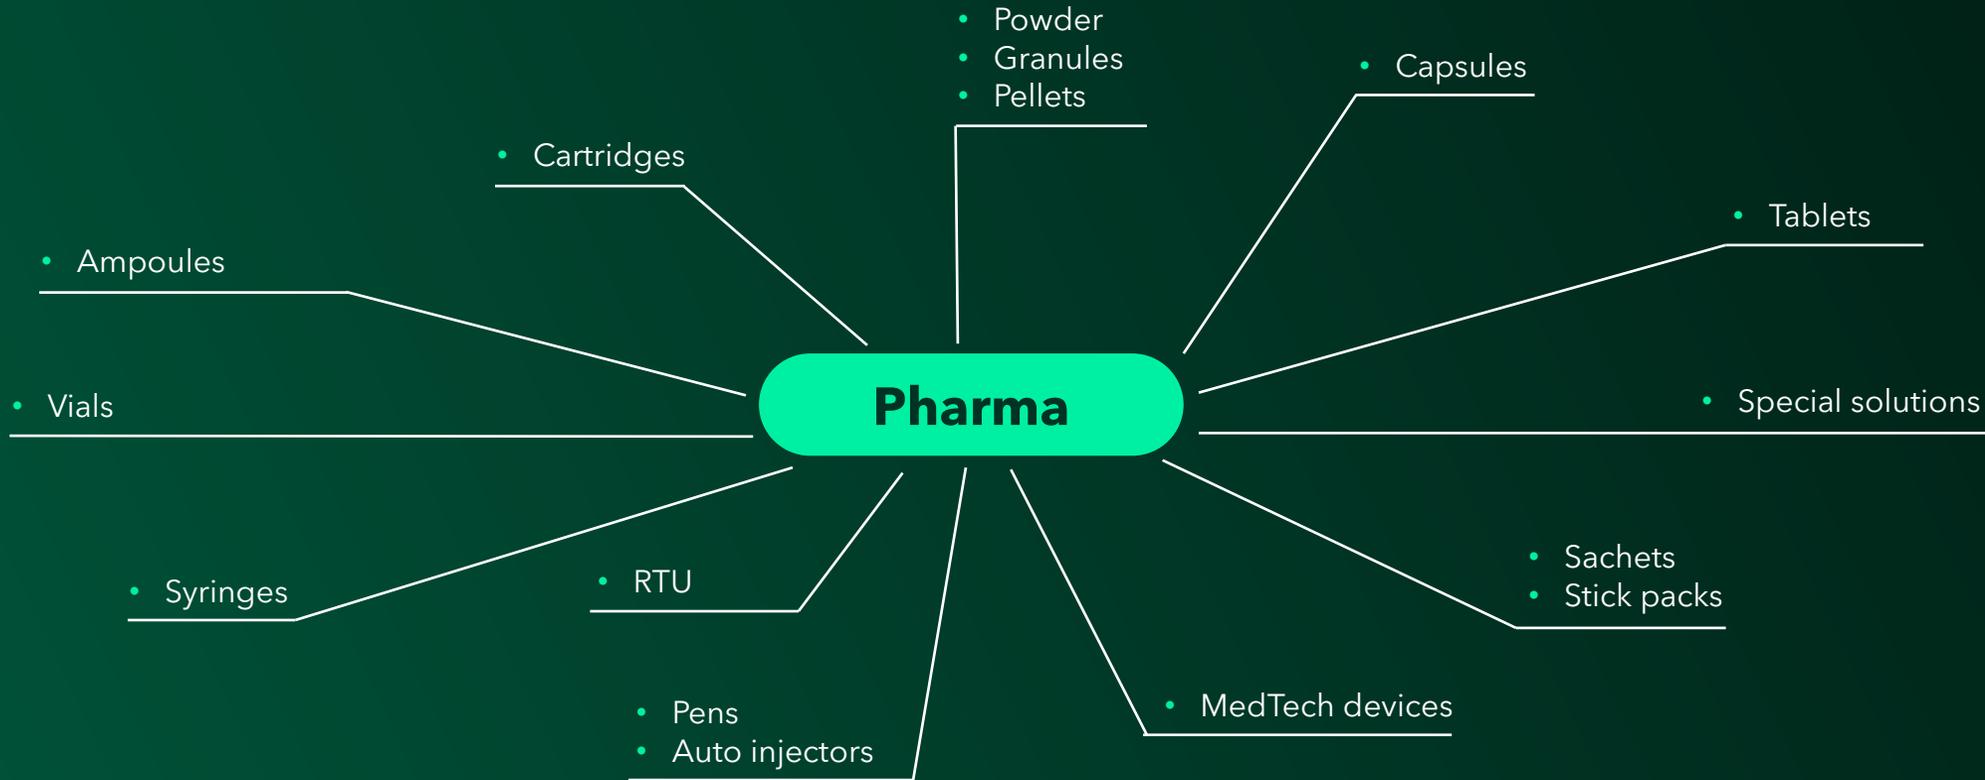

Our solutions

Pharma and Biotech

With a strategic focus on the growing pharmaceutical and biotech sectors, we play a vital role in global health care, providing in-depth process expertise and mission-critical technologies for the safe, efficient, and compliant production of essential medicines.

Solutions for all pharma packaging types and dosage forms

Our Pharma portfolio

Process technology

Liquid dosage forms

Inspection technology

Freeze-drying

MedTech devices

Solid dosage forms

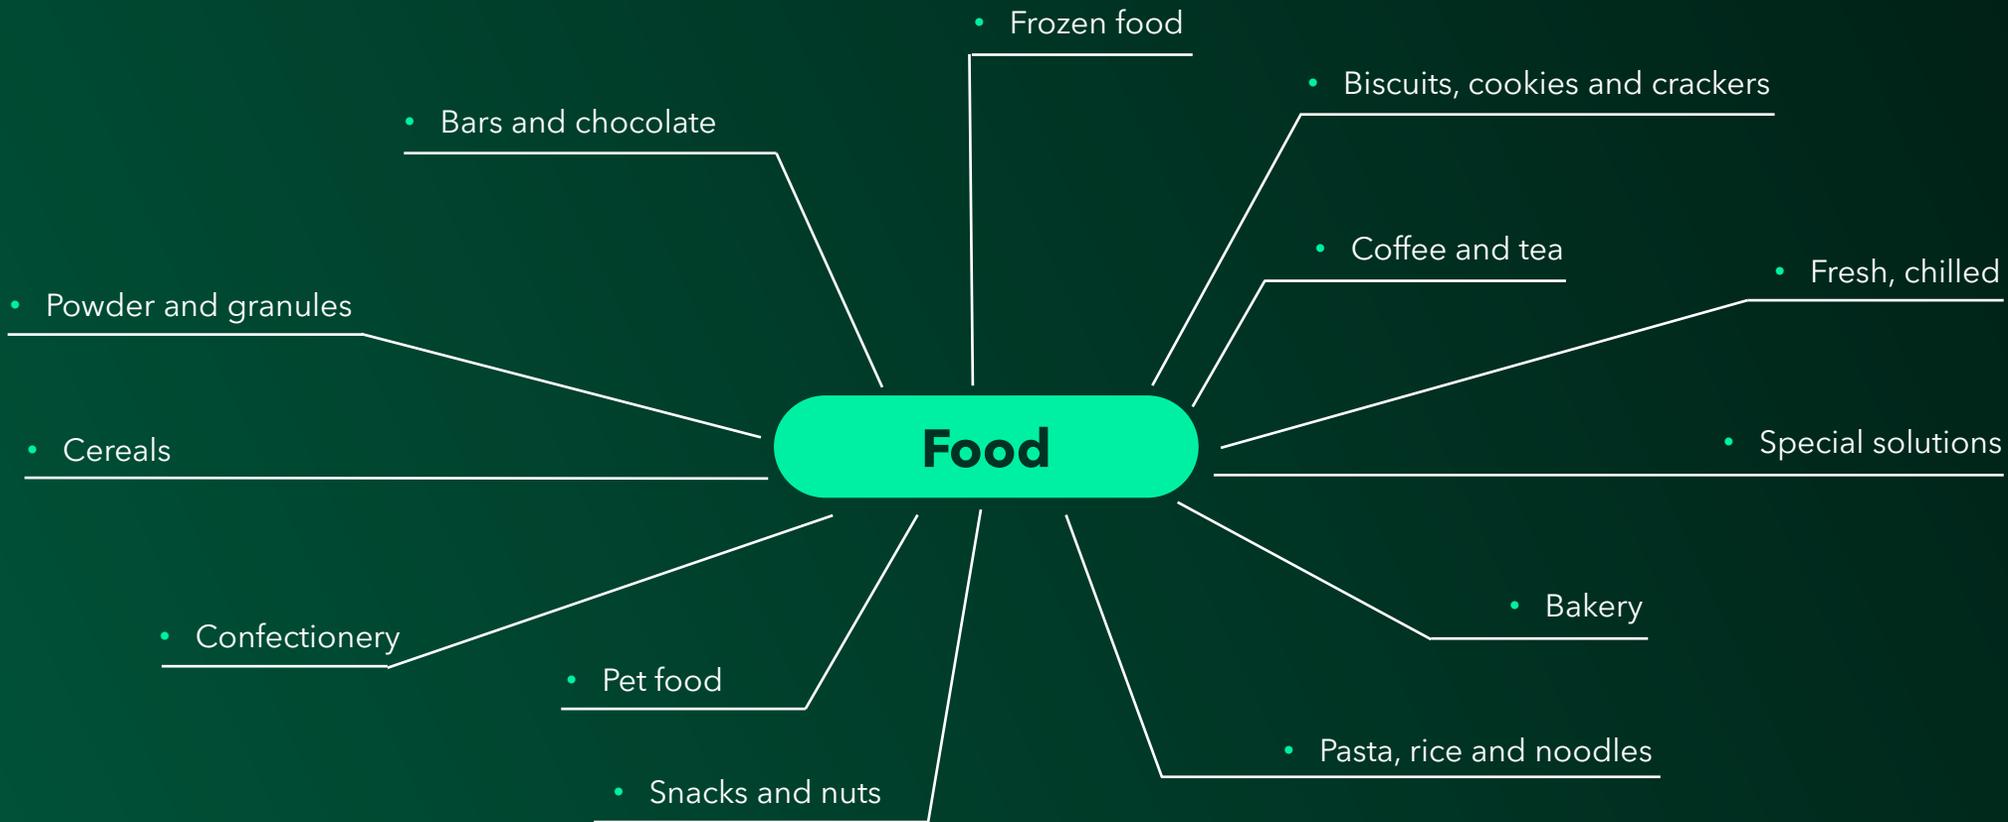

Our solutions

Food

In the food sector, we are recognized for our high-speed, high-precision packaging solutions, drawing on unique engineering excellence to help food manufacturers improve performance and product quality.

Diverse solutions for diverse food and pack styles

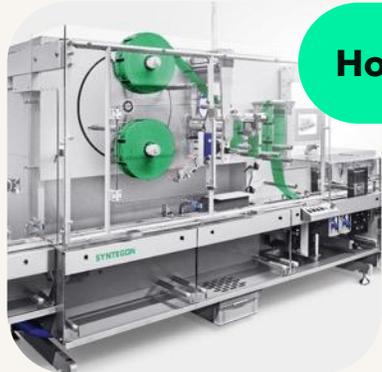

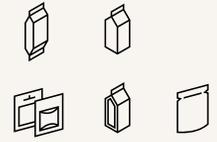

Our portfolio for the food industry

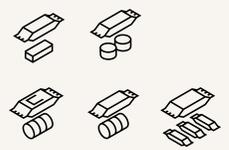

Process technology for confectionery

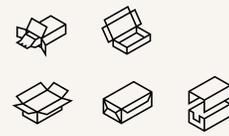

Vertical packaging

Horizontal packaging

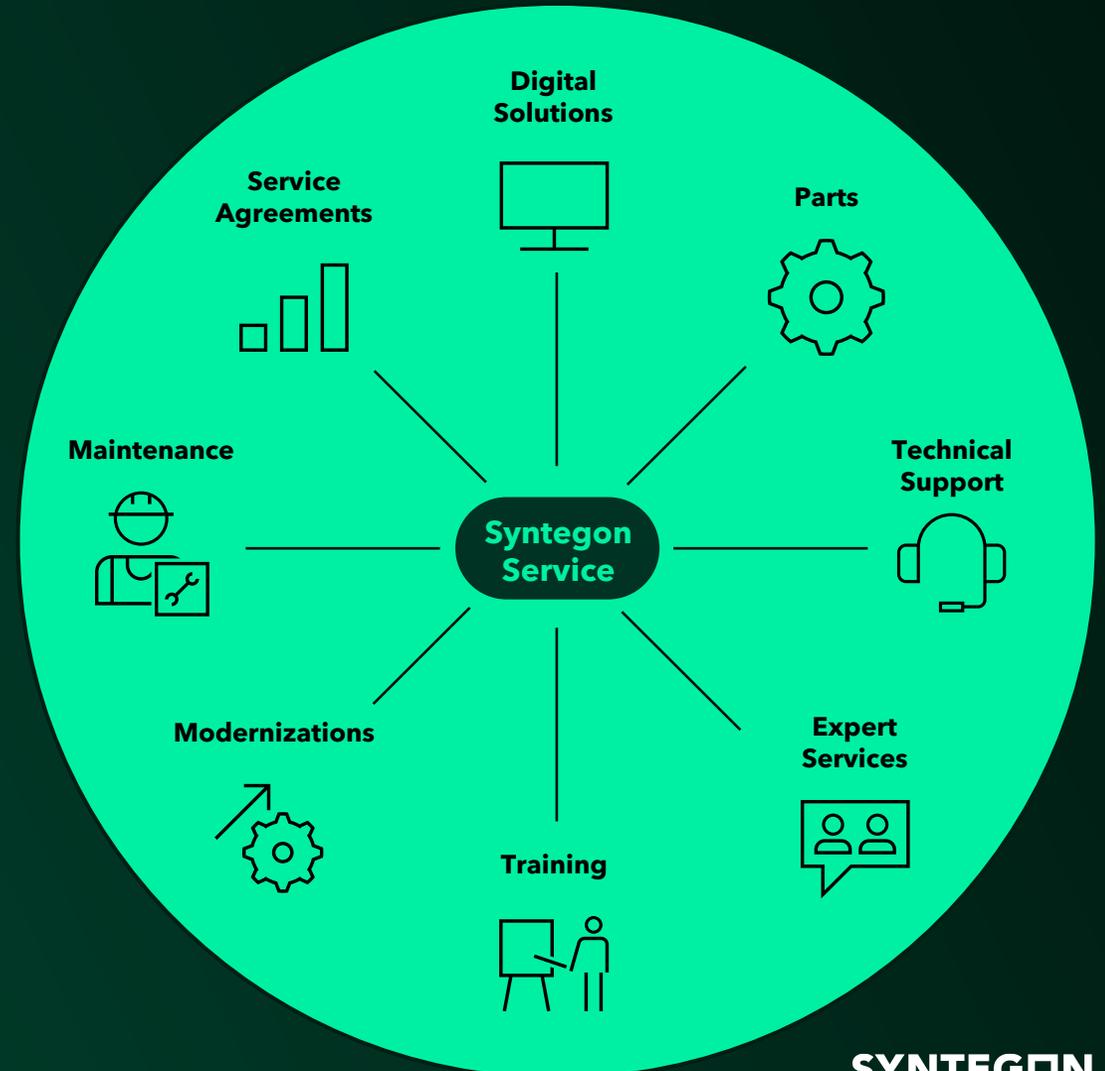

Cartoning and case packing

Innovative services tailored to your needs.

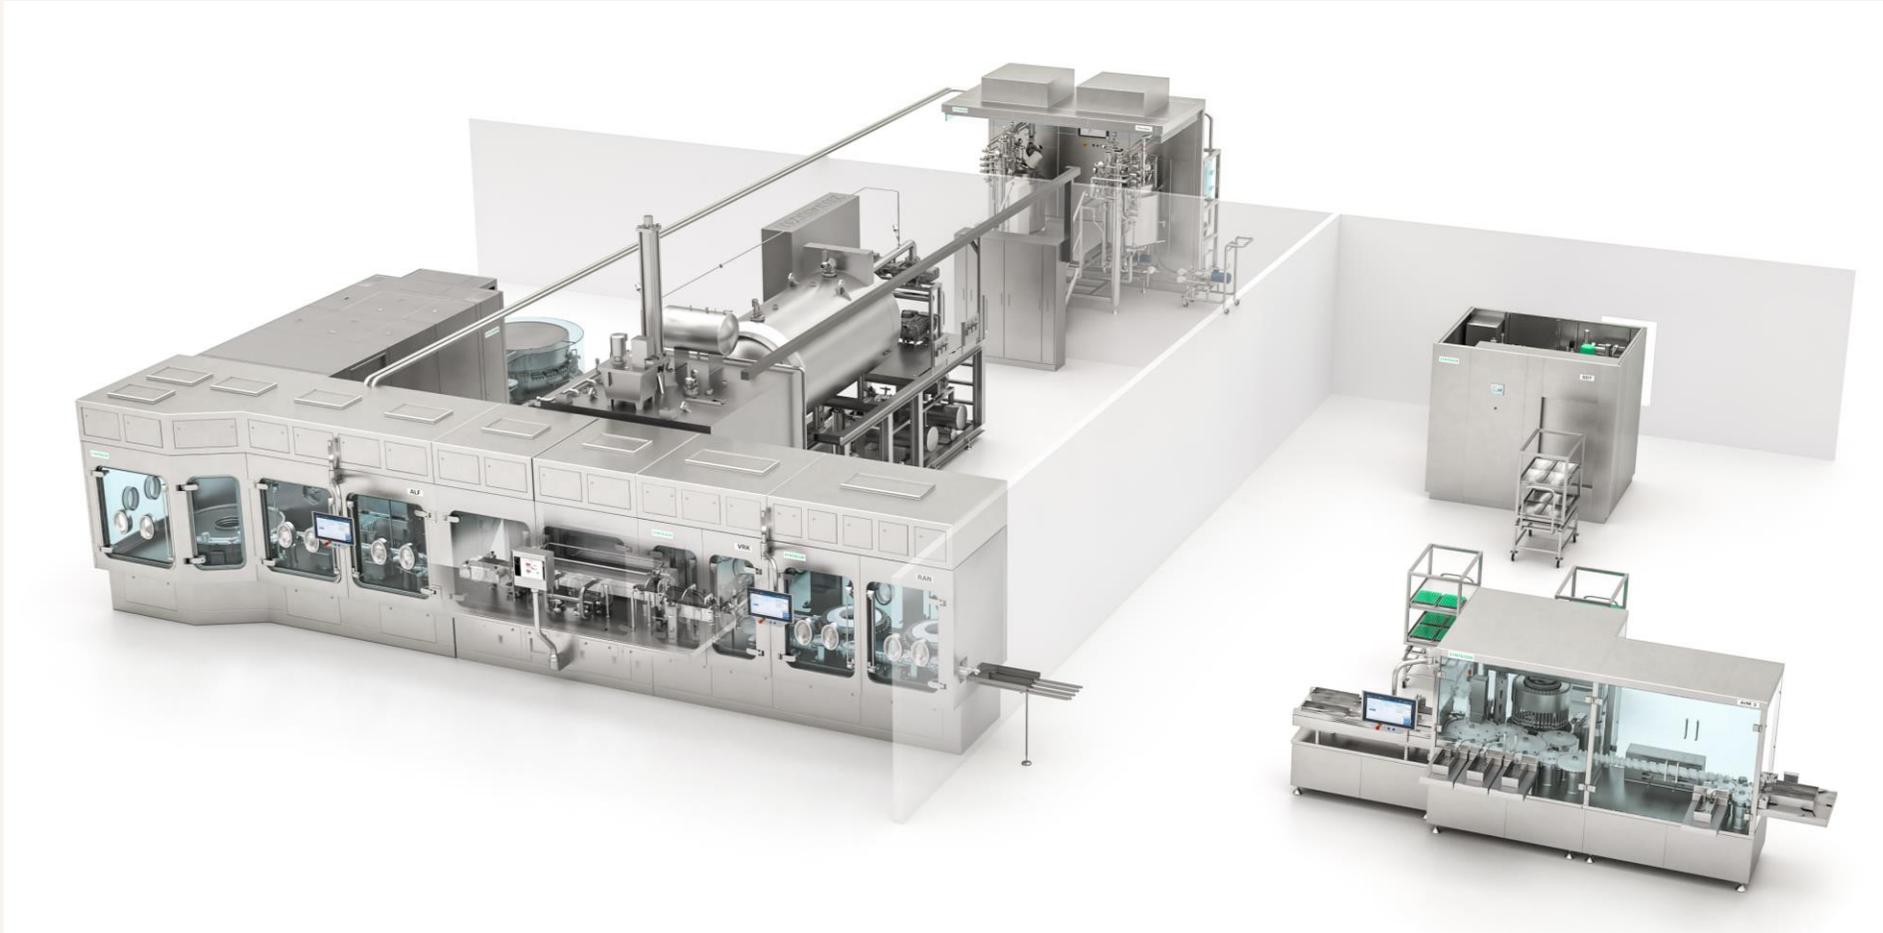

A comprehensive **service portfolio** lays the foundation for smooth production processes.

We support you throughout the entire machine life cycle, from spare parts management to digital line optimization.

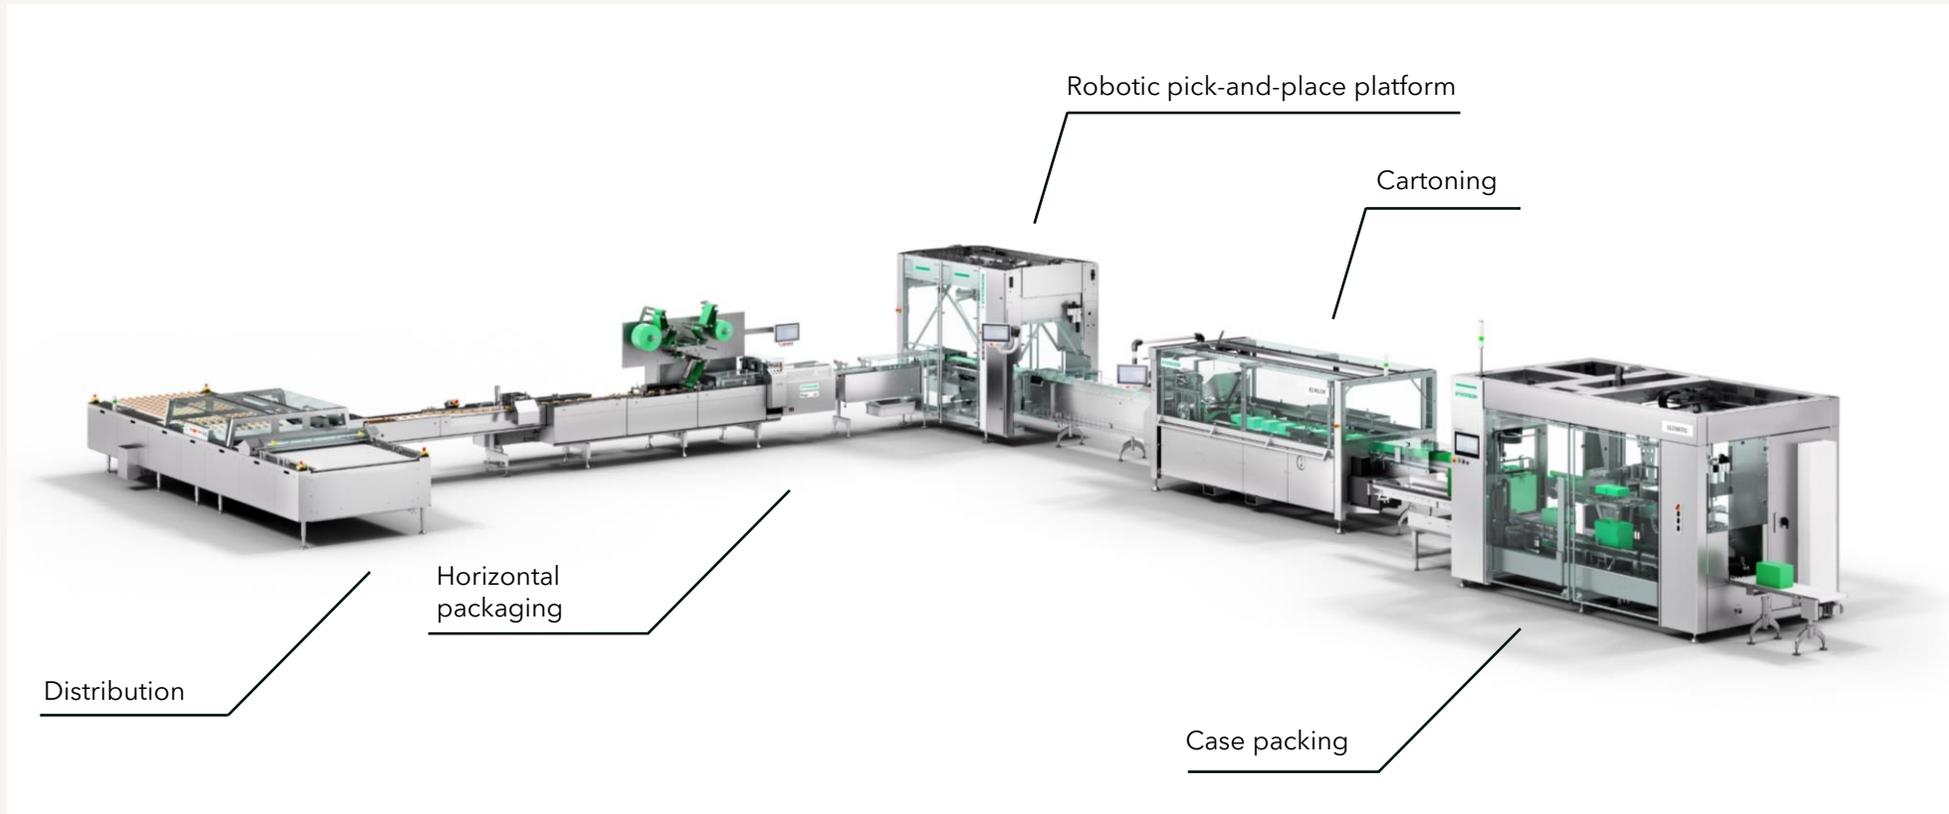

Exemplary vial liquid line

Complete line solutions from a single source.

Exemplary food system

System with primary packaging, cartoning and case packing.

160 years' experience. Always one step ahead.

1861

Geiger & Hesser sets up shop. The company came to be known as the cradle of German packaging machine engineering. It has been part of Syntegon since 1977.

1958

Höfliger + Karg unveils the first automatic capsule filling machine. It is a predecessor of GKF units ranging all the way up to the GKF HiProTect. Höfliger + Karg joined Syntegon in 1970.

1969

Robert Bosch Apparatebau GmbH is established, later to be renamed Bosch Packaging Technology.

1975

Eisai Machinery sells the first automatic inspection machines to detect particles in injection solutions. Eisai Machinery has been part of Syntegon since 2012.

1991

First implementation of an isolator for aseptic filling of ampoules. To date, several hundred isolators are in use by Syntegon customers.

2014

The linear motor technology for horizontal packaging machines replaces the chain conveyor, enabling reconfiguration to new formats at the touch of a button.

2015

Reclosable Doy-Zip stand-up pouches are used for the first time on a vertical bagger. Since then, Syntegon has advanced the state of the art in this technology several times.

2020

Bosch Packaging Technology becomes Syntegon.

2021

Syntegon develops individually configurable robotics pick-and-place platform and sets standards in the automation of packaging lines.

2024

Syntegon acquires Telstar, a leading global brand in aseptic processing solutions. With the joint offering, customers now have access to a seamless technology and service portfolio for the production of antibiotics, vaccines, or biologics.

2025

Together with two partners from the pharmaceutical industry, Syntegon is developing SynTiso: a groundbreaking, fully automated, glove-free filling line with the highest output on the market.
