

CURTIS PACKAGING
we take packaging personally

ABOUT US

Located in Sandy Hook, Connecticut since 1845, Curtis Packaging is a leading manufacturer of folding cartons and is a trailblazer in the luxury packaging industry, setting benchmarks for quality and design. With a legacy built on core family values, the company has consistently prioritized the well-being of its employees, fostering a culture of expertise, creativity, and innovation.

With a carbon neutral facility that runs on 100% renewable energy, Curtis Packaging has been recognized as the most sustainable packaging company in North America since the early 2000s. Our commitment to sustainable materials and environmental best practices not only meets but exceeds the demands of product manufacturers and discerning shoppers alike.

ENERGY

THE CURTIS DIFFERENCE

CARBON NEUTRAL

Our production facility is **fully carbon neutral**, with solar energy supplying 40% of our plant's power.

CREATIVITY

Our **industry-leading team** relentlessly pushes boundaries, dreaming up fresh and captivating ways to bring our clients' vision to life through structure, texture and depth.

Our comprehensive, in-house capabilities allow us to handle every step of the production process, from paper sheeting and ink mixing to structural design, die making, printing, die-cutting, stamping, folding, gluing, and final quality testing. We take great pride in our turnkey manufacturing solutions which **produce a consistent product time and again.**

CONSISTENCY

By **investing in state-of-the-art infrastructure**, we deliver products that are both fast and efficient, upholding the highest standards.

CUTTING-EDGE
