Family and Women-Owned: Founded in 1944, Accurate Box is a fourth-generation, family-owned and women-owned business.

State-of-the-Art Printing: We manufacture high-graphic litho-laminated boxes and displays, printing up to 7 colors plus UV coating in a single pass while achieving 200 line screen.

100% Recyclable: All of our packaging is 100% recyclable and printed with eco-friendly inks.

In-House Production: We print, corrugate, die cut, glue, and make all our tooling (plates, dies, and proofs) under one roof contributing to a smaller carbon footprint.

Structural Design: Our team designs custom structures that maximize shelf presence, protect products, and optimize efficiency on manual and automated production lines.

Quality Assurance: With a 99.98% acceptance rate across hundreds of millions of boxes shipped annually, we deliver consistent quality and meet customer expectations.

Efficient Manufacturing: We continuously reinvest in our manufacturing process to increase efficiencies, minimize waste, and reduce energy and water consumption.

Optimized Materials: Our manufacturing process allows us to use lighter weight papers while yielding above-standard strength, and we continually evaluate ways to reduce fiber without compromising product performance.

Green Transportation: We take advantage of rail freight and backhaul trucks, leading to less carbon emissions and competitive nationwide shipping.
