they receive.*

SECURIKETT®

WE STAND FOR **LONG-LASTING SECURITY AND INNOVATION**

Securikett is a family-owned business with global reach.

Whether it's anti-counterfeiting, anti-diversion, life cycle traceability, or simply giving your customers confidence in their purchases, we've developed the technology and manufacturing portfolio to make it happen.

Coming from the labels industry, Securikett today is a leading provider of innovative solutions for product security.

COMBINING **PHYSICAL** AND **DIGITAL** FOR **POWERFUL, EFFECTIVE** **SOLUTIONS**

Brands and organizations seek to control their distribution channels, comply with regulations, and meet the evolving demands of digitalization—all while building trust with end users.

At Securikett, we bring over 20 years of expertise and innovation to the table.

We listen closely to create solutions that deliver measurable results and exceed expectations. Every application tells a story, tailored to specific settings and requirements.

Our main applications are :

- Anti-manipulation and tampering
- Proof of originality
- Supply chain visibility
- Life cycle traceability

Find out more on the following pages.

RESEARCH AND OPERATIONS FROM A SINGLE SOURCE

Securikett builds its strategy around an overarching value creation chain.

R&D plays a major role, both in the development of labels and software for traceability.

By seamlessly integrating innovation into operations, we eliminate redundant interfaces across organizations, ensuring efficiency and effectiveness.

EMBEDDED **TAMPER EVIDENCE** IS THE **PREREQUISITE** OF ANY **SECURITY LABEL**

Tamper-evident labeling is essential for any effective security solution. Securikett is a leader in VOID technology.

When a label is removed, words such as **VOID** or **OPEN** or symbols such as an **OPEN LOCK** become and remain irreversibly visible.

The packaging cannot be resealed, and the security features cannot be fraudulently reused.

Our patent-protected technologies include transparent, translucent, opaque, and paper labels.

They can also detect tampering caused by water or heat, ensuring comprehensive protection.

INDIVIDUAL HOLOGRAM

INDIVIDUAL VOID EFFECT

CODIKETT CODE

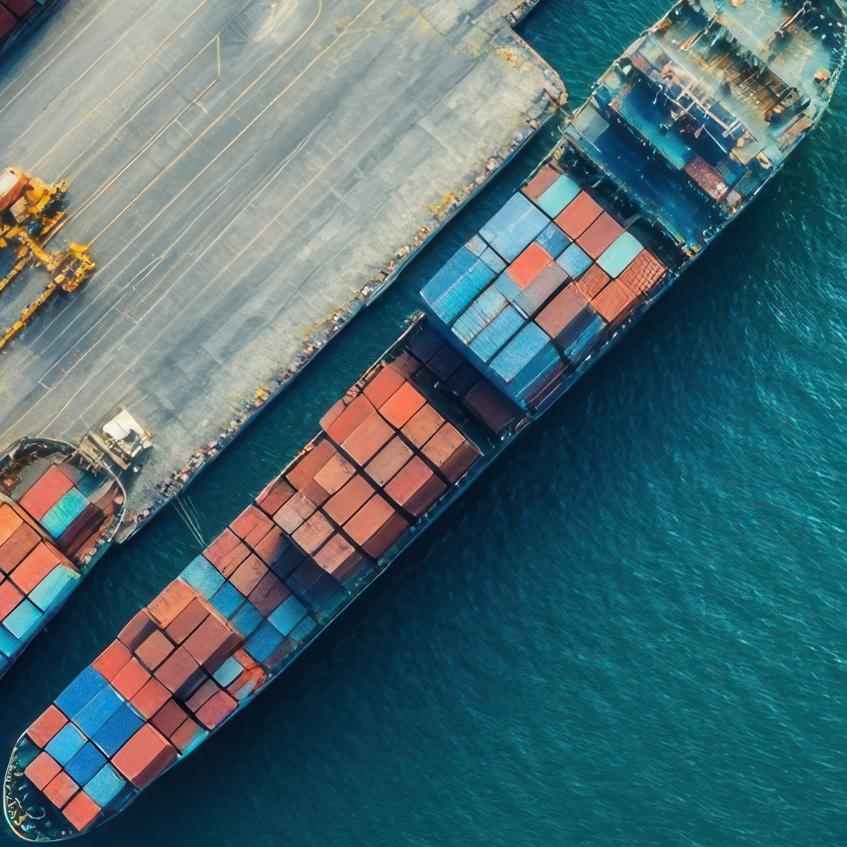

HIDDEN CODE

PROOF OF **ORIGINALITY**

By integrating both digital and physical authentication features into a single label, we enable users to easily verify the authenticity and originality of their purchases.

Not only consumers, but also inspectors, can quickly distinguish between genuine and counterfeit items.

Our comprehensive **Security**Labels are fully customized to align with our clients' corporate design, packaging and functional requirements.

SUPPLY CHAIN VISIBILITY

CODIKETT, our digital platform, is a proprietary product of Securikett.

Highly scalable, secure, and high-performing, it is designed to meet the needs of large and distributed organizations.

Our system uses unique identifiers, such as QR codes, to trace distribution channels, uncover parallel trading and counterfeiting, and engage directly with end users

PRODUCT **LIFE** CYCLE **TRACEABILITY**

Product digitalization is no longer just a future trend—it's already here.

EU legislation now mandates **digital twins** and the control of recycling schemes through QR codes and unique identifiers, creating a “**Digital Product Passport**” (**DPP**).

With the CODIKETT digital platform, you can stay ahead of the curve by securely linking to information that meets today's requirements—and anticipates tomorrow's needs.

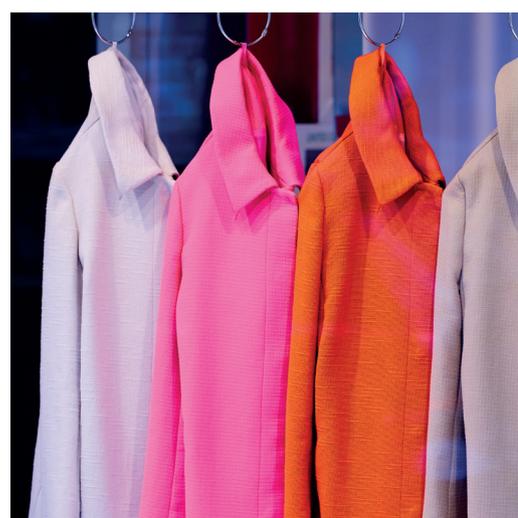

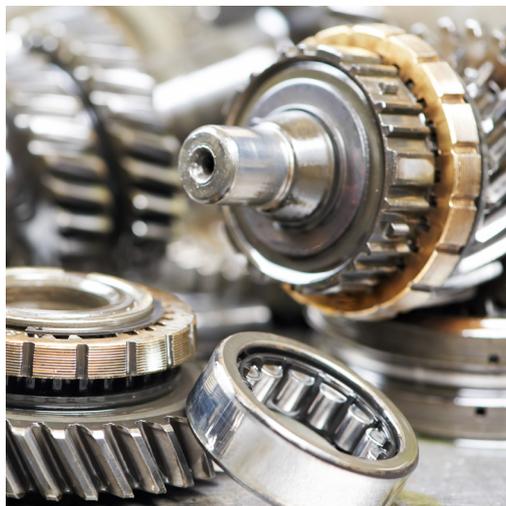

CONSUMER EXPERIENCE AND TRUST

Our labels not only meet high aesthetic standards—they also deliver the security that strengthens consumer trust.

Today, more than ever, consumers are interested in and care about the origin of the products they buy.

Be proactive—engage with your end users and strengthen their confidence in your brand!

REGAINING **CONTROL**

We export worldwide, serving industries such as pharmaceuticals, medical devices, cosmetics, luxury goods, wine & spirits, technical parts, and chemicals.

Talk to our team about references and real-world use cases. Discover how our clients have achieved greater market control with our solutions.

CONTACT US

We are happy to provide samples to suit your individual industry requirements, whether cosmetics, fashion, spirits, industrial or other.
