

TAPÌ GROUP

COMPANY PROFILE

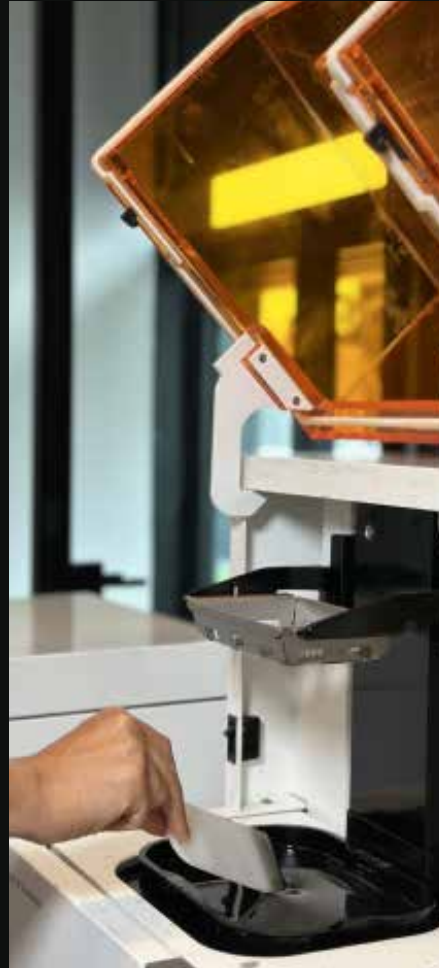

OUR VALUES

Innovation at Tapi is not a coincidence—it's a mindset.

With **20+ years of R&D and industrialization know-how**, we drive innovation through **continuous improvement** and **advanced control technologies**—transforming expertise into solutions that anticipate tomorrow's needs.

INNOVATION

PEOPLE

People are our strength. We foster a culture of **responsibility and inclusion**, encourage the **active engagement of our teams**, and embrace international collaboration as a driver of innovation. By **listening carefully to our customers**, we turn dialogue into lasting partnerships.

QUALITY

Quality is not just a standard to meet, but a commitment to exceed. Our **quality system is built on a Total Quality Policy**, designed to ensure excellence at every stage. By focusing on **prevention rather than correction** and applying **rigorous controls**, we safeguard consistency, reliability, and trust across all our products.

SUSTAINABILITY

Sustainability is at the heart of what we do. We embrace **responsible production**, powered by alternative and **renewable energy sources** and strengthened through ongoing **research and innovation**. It's a mission: reduce the impact on the environment to look after the planet, leading our industry with responsibility and integrity.

DESIGN

To us, design is where aesthetics meet performance. Each closure is conceived as a **synthesis of beauty and functionality**, crafted to elevate both the product and the experience. We see **customization as a distinctive lever**—a way to enhance every brand's identity with unique shapes, finishes, and details. Delivering visual and perceived quality that customers can see and feel is our daily commitment.

THE TAPÌ GROUP

Tapì Group, acquired by British private equity firm Stirling Square Capital Partners in February 2023, is a global leader in the design, production, and distribution of innovative closure solutions. While primarily focused on the premium beverage sector, Tapì's expertise extends beyond spirits to include wine, beer, condiments, and cosmetics.

With a workforce of over 900 professionals worldwide, Tapì serves more than 5,000 clients across 80 countries. The company's global footprint encompasses production facilities, commercial offices, research and development laboratories, and an extensive distribution network, solidifying its position as an industry innovator on an international scale.

- A global presence with production and commercial sites, area managers, and distributors.
- Partner of the world's top 10 groups in the spirits industry.
- Together with Ganau, the third-largest global producer of micro-agglomerated closures for the spirits and wine industries.

INNOVATION & DEVELOPMENT

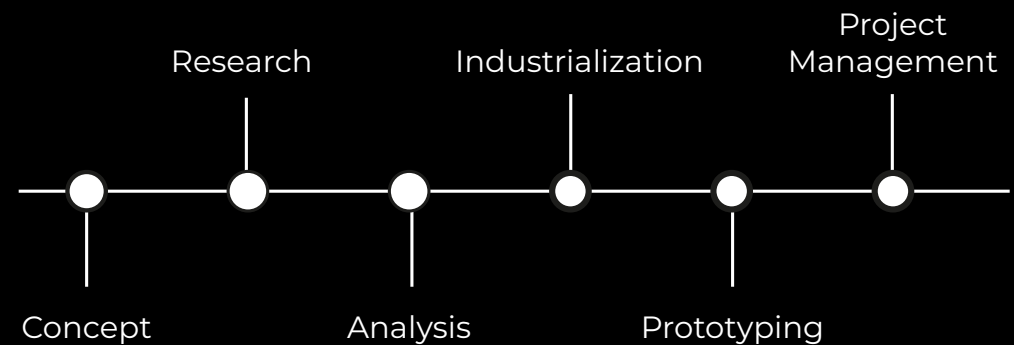

Over the years, **Tapì has built a team of designers** capable of developing more than **1,000 projects every year** for both new and long-standing clients.

Our **global R&D department brings together nearly 30 specialists** dedicated to creating innovative products. They are supported by an **in-house prototype workshop**, which keeps the company at the forefront of advances in polymers and eco-friendly technologies.

Each of our **production facilities features dedicated research laboratories**, coordinated by Tapì R&D, focused on selecting new raw materials, testing applications, and refining quality controls.

From concept to reality, **every closure is first designed digitally and then physically tested**—evaluating sealing, safety, and performance—before entering full-scale production.

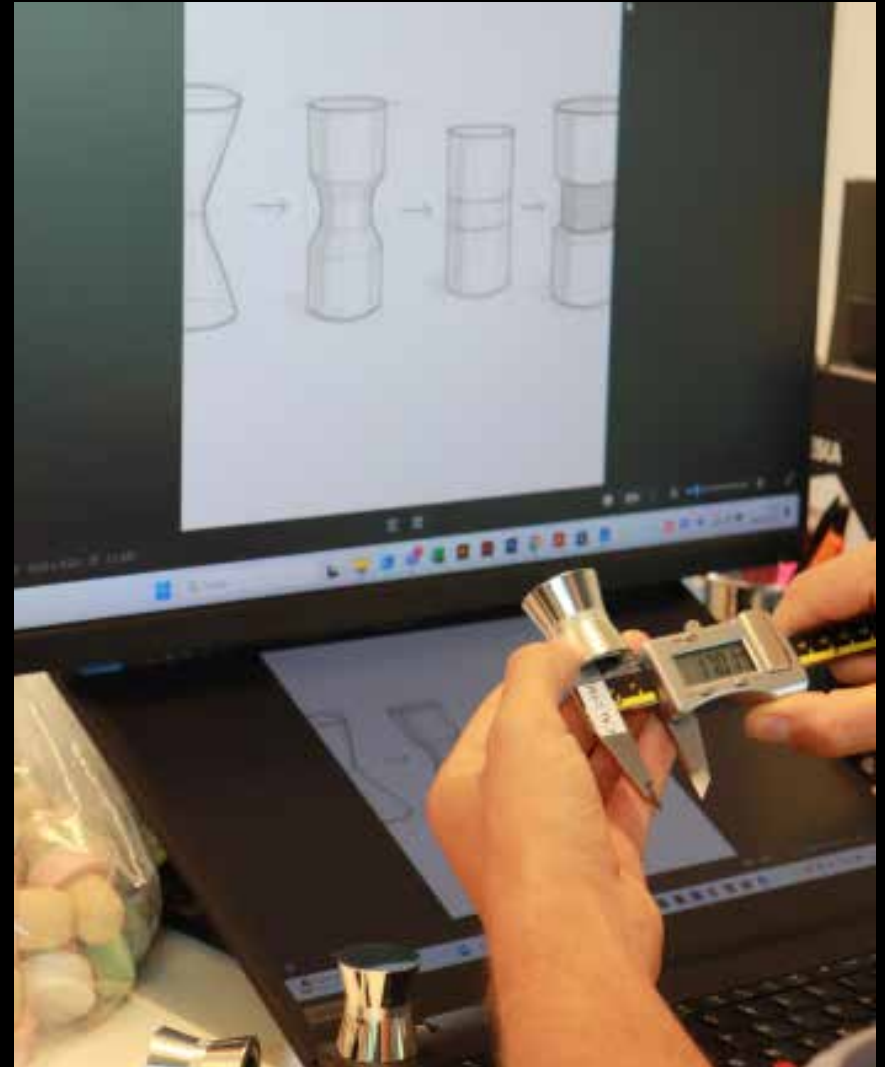

OUR QUALITY POLICY

The cornerstone of the Tapì quality system is the “Total Quality Policy”, based on prevention and reinforced by controls:

- Customer: feedback, specific requirements, customized approvals.
- R&D and Industrialization: over 20 years of know-how, continuous improvement (PDCA approach).
- Supplier Quality Management: technical specifications, KPIs, audits, incoming inspections.
- Production Quality Management:
 - control of critical process parameters;
 - involvement of line operators in quality management;
 - full traceability;
 - 5S approach.

All Tapì closures undergo 100% automatic and visual inspections.

LOW
ENVIRONMENTAL
IMPACT

LEI, Low Environmental Impact, clearly represents the Group's mission: to reduce environmental impact and take care of the planet.

Sustainability is a key value for our companies.

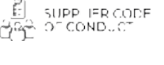

We have always been committed to ensuring production methods and processing techniques that are as sustainable as possible, adopting alternative and renewable energy sources, and continuing to invest in research and innovation. The culture of innovation is therefore part of our DNA, as is our ambition to act as responsible players in our industry.

INTEGRATED MANAGEMENT SYSTEM

Our Integrated Management System encompasses all Tapì processes within a comprehensive framework, enabling synergistic work toward unified objectives. This also applies to corporate sustainability: the entire Group is committed to developing projects that fully meet both current and future needs.

GOALS ACHIEVED: THE SUSTAINABILITY REPORT

At Tapì Group, we strongly believe in communicating with transparency. We also think environmental, social and governance responsibility is necessary to create value for Tapì Group and the stakeholders. To demonstrate our dedication, we publish our Sustainability Report prepared by the Global Reporting Initiative Standards every year. This Report is a fundamental tool which helps us describe the Group's position on sustainability topics regarding corporate social responsibility over the medium and long term.

CIRCULAR INNOVATION, UNCOMPROMISED EXCELLENCE.

Neos by Tapì is our next-generation range of ISCC PLUS certified products, designed to support the transition towards a more sustainable future. Developed through a mass balance approach using alternative feedstocks, Neos delivers the same quality, characteristics, and performance as conventional products—with the added value of sustainability.

The Neos portfolio includes solutions produced from renewable feedstocks and from recycled materials derived from the chemical recycling of mixed plastic waste.

With Neos, Tapì combines innovation, responsibility, and performance, offering a concrete step forward in the circular economy.

THE ISCC PLUS CERTIFICATION

ISCC PLUS is a voluntary certification scheme developed by ISCC (International Sustainability & Carbon Certification) that enables companies across the entire supply chain to demonstrate the sustainability of their products through compliance with **sustainability, traceability, and mass balance requirements.**

Tapì has obtained ISCC PLUS certification at all its production sites, making the Neos+ISCC PLUS range available for the majority of synthetic products derived from polymers and biopolymers.

SUSTAINABILITY HAS A NEW ESSENCE. THREE INDEED.

Neos by Tapi is an innovative technology that reduces a product's carbon footprint by adopting polymers from renewable sources.

THE ADVANTAGES OF NEOS TECHNOLOGY

NEOS is the point of arrival for technology introduced by Tapi over 5-years ago, and confirms our vocation as **groundbreakers in eco-sustainable solutions** applied to the world of **closures in the spirits industry**.

With **NEOS technology**, the use of **bio-based polymers**, derived from raw vegetable resources, is strongly encouraged as a **sustainable alternative** to fossil-based polymers, resulting in both **lower environmental impact** and **comparable mechanical performance** to traditional polymers.

For years, **sustainability** has been the **core of Tapi's values and strategy**: with NEOS technology, we are committed daily, to create **environmentally friendly closure systems**, **reduce waste and increase efficiency**.

Tapi | UNIQUENESS ON TOP

**Uniqueness
On Top.**

At Tapi we
believe a
closure is

not merely meant to
close. It is an opportunity
to make a bottle, every bottle,
different. That's why we constantly
develop pioneering solutions to
challenge the role of stoppages.
No matter if the innovation
is a never seen before shape, a
revolutionary sustainable material
or a groundbreaking new idea of
luxury. The goal, what's at the
top of our priorities and vision, is
exclusively one thing: **uniqueness.**

TAPÌ'S WORLDS

The Worlds of Tapi are coherent ecosystems representing a category of products with a shared identity. Materials, production techniques, and shapes are the main characteristics that define each world.

UNIQUENESS ON TOP

STATUS

A culture that values **beauty**, conveyed through **product design**. In **Status World** each closure transports you to a magical **atmosphere** capable of giving each product a taste of **luxury** and **elegance** thanks to the timeless beauty of materials such as **wood** and **ceramic**.

In this world, you will find highly **aesthetic closures** with ergonomic and innovative designs characterized by an incredible charm that can transform a simple closure into a **jewel** of rare beauty.

STATUS

Tapi

UNIQUENESS ON TOP

PLANET

Reducing consumption and waste production, **reusing** components to breathe new life into them, turning waste into **new materials**, rethinking packaging, and **respecting the environment** through natural materials: this is our commitment to developing pioneering **green solutions**. This is **Planet**.

We create closures using innovative systems that combine functionality, eye-catching aesthetics, and a focus on **sustainability**. Enter the **Planet World** and find all the closures made to **respect** the planet where we live.

PLANET

Tapi

UNIQUENESS ON TOP

STYLE

Style is something that can be interpreted in many different ways, it is how you express yourself to the world. We choose to show our **Style World** through high-tech, shimmering and vibrant closures.

Reflections, colors, and man-made materials are the best choice to better represent the essence of this world and to make every bottle **different** and **memorable**. Every closure tells a story made of **fun**, combinations of **highlights, colors, and radiance**. Style is a world capable of let go out and enhancing the **soul** of **every spirit**.

STYLE

Tapi

UNIQUENESS ON TOP

GOURMET

When it comes to food, there is one word that can depict quality, refinement, study, and attention to detail: **Gourmet**. This world is made by closures capable of making us enter into a home reality where food enthusiasts are ready to live an incredible taste experience. The closures of this world are elegant but simple and capable of bringing our attention to every single impeccable detail.

Beauty and minimal design go hand in hand with functionality to create products that make the moment of pouring simply unforgettable.

GOURMET

Tapi

UNIQUENESS ON TOP

CRAFT

Passion, heritage and a taste of wildness: the **Craft World** is all about **suggestions** and **inspirations**. The closures of this world are made of a **retro, artisanal style**, designed to enhance any product in a simple but **original** way.

Raw woods, aluminium, and man-made materials are the elements that shape incredible closure capable of bringing out numerous solutions and finishings such as embossing and debossing.

TAPÌ'S BEAUTY COLLECTION

BEAUTY ON TOP

Tapì's Beauty On Top collection combines clean lines, premium materials such as aluminum, plastic, wood, and ceramic, and customizable color options to create a closure that reflects the unique identity of your brand.

Thanks to our Tailor-Made service, Tapì can craft bespoke closures with custom colors, logo printing, exclusive patterns, and special finishes like embossing or debossing—enhancing every detail of your bottle.

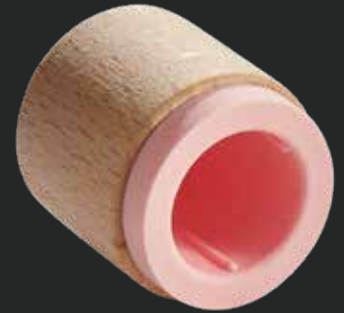

From minimalist design to sustainability, the Beauty line offers fully customizable closures in carefully selected materials—including specialty options—for a refined, functional result that perfectly complements cosmetic packaging.

HOME FRAGRANCE

Elegant and functional closures designed for reed diffusers and fragrances, available in premium and sustainable materials. Made from wood, aluminum, or ceramic, this range combines style and innovation, offering extensive customization options to create distinctive and environmentally conscious packaging solutions.

PERFUME

Refined and distinctive closures crafted for perfumes, featuring premium materials such as wood, aluminum, resin, and zamak.

Each over pump is designed to elevate the sensory experience, with customized shapes and finishes that reflect the brand's identity while ensuring a precise and secure fit.

CANDLE

Thoughtfully crafted lids for high-end candles, where artisanal quality meets brand storytelling.

Made from premium wood, each lid can be personalized with engraved details and unique textures, offering both protection and a distinctive finishing touch that elevates the packaging experience.

THE TAPÌ COLLECTION FOR WINE: HIGH-PERFORMANCE SYNTHETIC CLOSURES

The Tapì wine closure collection offers a range of solutions in synthetic, with shapes and technical performance designed to meet the aesthetic and functional needs of the market.

EXEL

Exel is a synthetic closure designed for sparkling wines, easy to use even without an orientator and able to maintain the cork's characteristic mushroom shape. Thanks to its excellent CO₂ resistance and the high chemical neutrality of its materials, it preserves the wine's freshness and aromas over time.

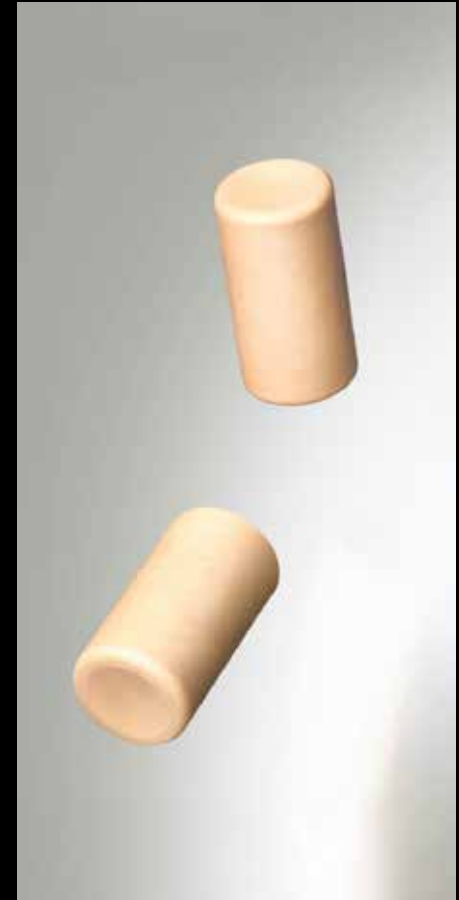

POP

Pop is a synthetic closure designed for semi-sparkling red and white wines, ideal for pressures up to 2.5–3 bar. Thanks to its excellent CO₂ retention, high organoleptic neutrality, and closed-cell structure, it preserves the wine's freshness and aromas over time, ensuring stability even during transport.

POP LITE

Pop Lite is a synthetic closure designed for red and white still wines, ideal for bottles with very wide necks and demanding bottling conditions. Thanks to its excellent pressure resistance, high organoleptic neutrality, and closed-cell structure, it ensures closure stability and preserves the wine's aromatic structure over time.

SOFT

Soft is a high-performance synthetic closure designed for quality red, rosé, or white wines, allowing the bottle to be re-corked while preserving freshness and primary aromas. Thanks to its elasticity, excellent CO₂ retention, outstanding O₂ barrier, and high organoleptic neutrality, it protects the wine from oxidation and maintains its aromatic structure over time.

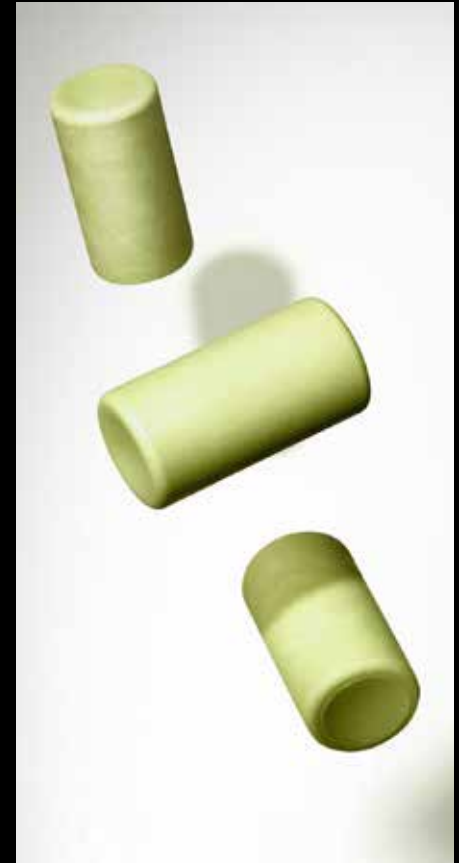

TEC

Tec is a high-performance synthetic closure designed to protect quality wines, ideal for premium red and white wines that require years of bottle aging. Thanks to its uniform structure, high oxygen barrier, and highly neutral materials, it ensures consistent performance over time, protecting the wine from oxidation and preserving its aromas.

ALPHA

Alpha is a synthetic closure designed for quality red, rosé, and white wines, ideal for preserving the freshness and primary aromas of fresh and fruity wines over time. Thanks to its elasticity, excellent CO₂ retention, high O₂ barrier, and high organoleptic neutrality, it ensures easy extraction, protects against oxidation, and maintains the wine's aromatic structure.

EASY

Easy is a synthetic closure designed for fresh quality wines, ideal for early consumption.

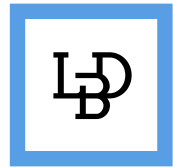

It provides the same standards of organoleptic neutrality, precision, and stability as the Tapì range,

PURITY

Purity is a bar top closure with head and stem made from latest-generation synthetic material.

Its exclusive, transparent one-piece design provides cutting-edge aesthetics and high functional performance through an innovative molding system without the use of adhesives.

D E L A G E

COGNAC, FRANCE - 1941

Excellence is just the result of an extraordinary experience.

Our closures would not be as **exceptional** if we weren't based in **Cognac**. They would not be as **sophisticated** if we weren't **French** and they would not be as **innovative** if we weren't founded in **1941**. They are the **result** of more than **80** years of constant **evolution**, whether in **design, performance** or **environmental impact**. They are who we are, as a **company** and as **people**. **That's what an extraordinary experience really means. That's excellence.**

ABOUT DELAGE COLLECTIONS

Delage's collections are a mixture of beauty, ambition and elegance. Highly customizable closures designed to meet the highest of standards.

Extra

Extra collection

Beauty is in the details.
Luxury and **expertise** come together in this unique collection of **bespoke closures**.

Discover the apex of French savoir-faire: rare, delicate and **exceptional materials** used to create the most extraordinary designs.

Excellence

Excellence collection

Design, quality, personality and sustainability:

this is the ultimate **luxury**. **The Excellence collection** includes bespoke and standard **premium plastic** closures, all created to enhance and represent the excellence of every **decanter individuality**.

Exception

Exception collection

Respect is the only way to elevate **nature** and reveal its **unequaled beauty**.

The **Exception collection** enhances this vision, through **premium wood closures**, all created from **superior quality raw materials**, with the **thoroughness** of an artisan and produced with **state-of-the-art technologies**.

The Exception collection was dreamt and designed to perfectly **preserve** and **personalise** your spirits.

Expression

Expression collection

Practical, functional, adaptable, but also **exclusive** and **premium**. The **Expression collection** conveys plastic **bottle closures** and **GPI screw caps** in a highly customizable design.

A **unique closure** for your **unique spirits and liquors**: stoppers from the **Expression range** are thought to be fully **tailor-made**.

Experience

Experience capsule

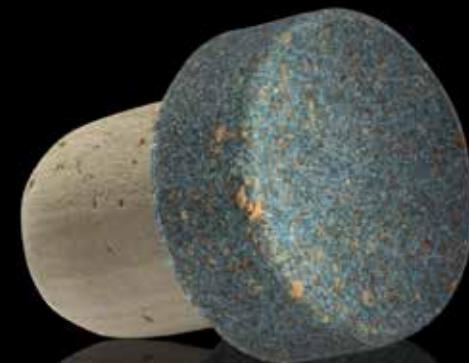

Matching the **pace** of the spirits packaging **industry**, the **Experience capsule** offers unique and unexpected **intelligent closures**, designed to provide brands with **traceability, authentication** and **marketing** solutions.

Explore capsule

Innovation means making **choices** that make the **future better**. This is the essence of the **Explore capsule**: a new generation of ultra-premium closures with a lesser carbon footprint.

Transforming waste and secondary materials into **resources** reduces our dependence on virgin materials.

GANAU

CORK ANOTHER WAY

9 DECADES OF EXPERIENCE: *the cork mastery*

Heritage. Experience. Technology.

Founded on the Italian island of Sardinia in 1941, Ganau relies on nine decades of experience and the integration of **modern technology** in its pursuit to produce the finest corks possible.

By focusing on **sustainable practices**, stringent quality control standards, and innovative production techniques, Ganau has **revolutionized the way cork is processed** in order to meet the demands of eminent winemakers everywhere.

CORK ANOTHER WAY

TRADITION AND INNOVATION *in premium cork closures*

Ganau combines tradition and innovation, transforming Sardinian cork into premium closures. Thanks to exclusive processes and close collaboration with local growers, each cork guarantees **quality, sustainability, and respect for the raw material**. Attention to detail and advanced technologies ensure reliable closures that preserve the wine's integrity and support its evolution over time.

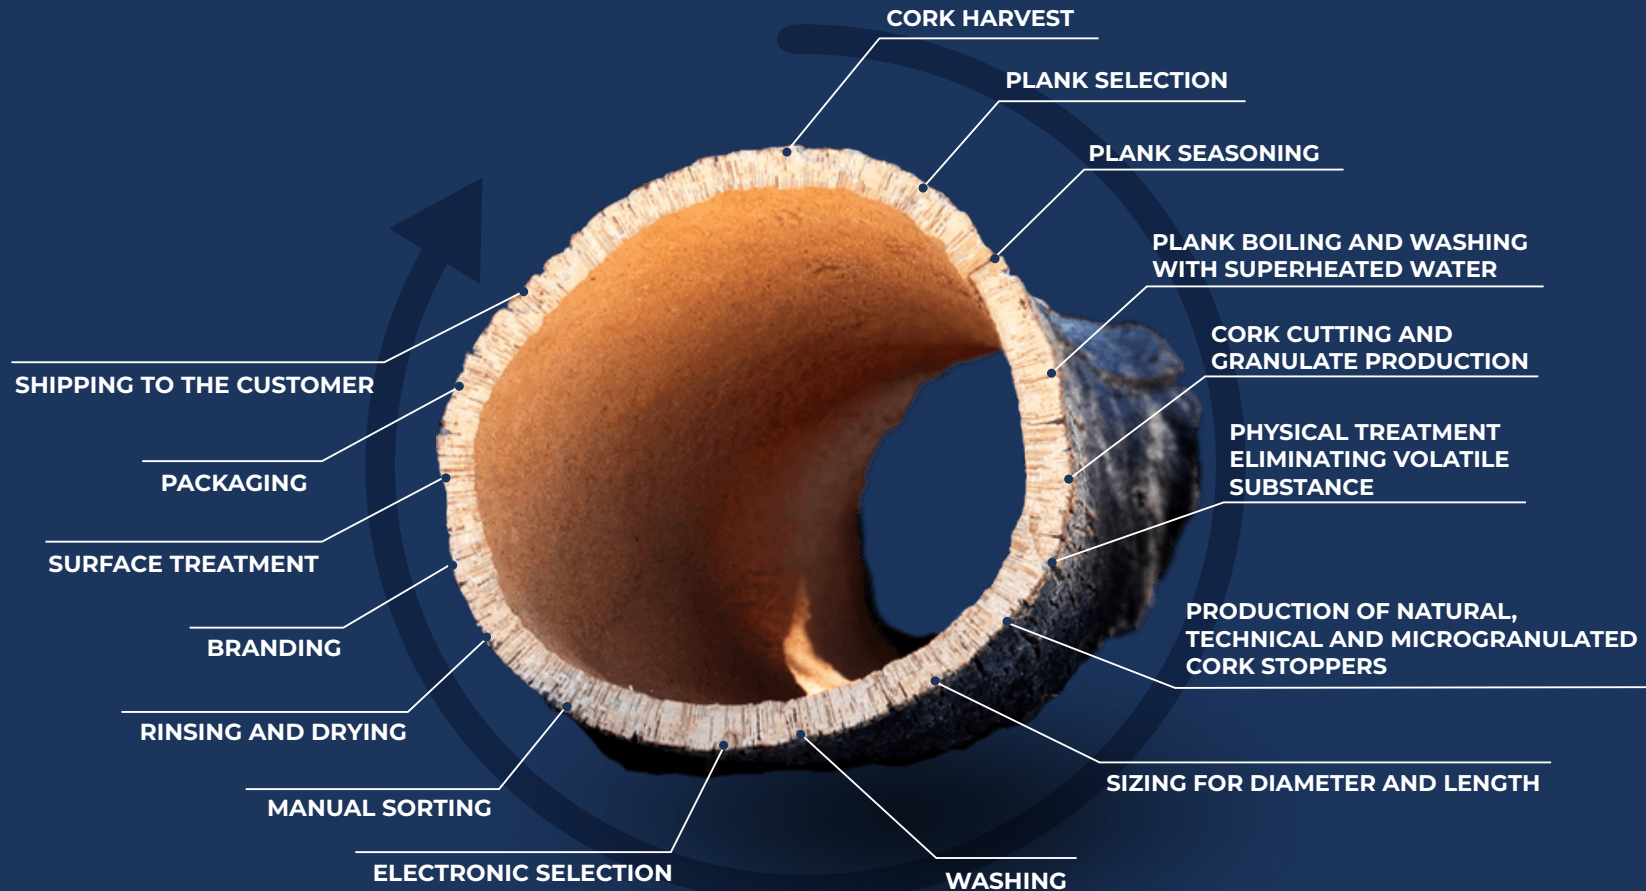

Exclusive processes such as REVO-BOIL, TECH-FLOW, and QUANTUM ensure purity and respect for the raw material, while HYDRO CLEAN, TWIN COMPRESSION, and SKIN PLUS enhance performance. Each cork is the result of a journey of sustainability, reliability, and a passion for excellence. Completing the process, EPIQ—a high-resolution TOF mass spectrometry system—analyzes each cork in three seconds, eliminating any risk of error and providing a safe, reliable, and scientifically guaranteed closure.

IL METODO GANAU

At the heart of Ganau's mission is a relentless **pursuit of excellence**. We understand that our corks play a pivotal role in wine quality, and we relentlessly strive to produce closures that not only meet but **exceed the highest industry standards**.

Through **innovation, sustainability, and meticulous attention to detail**, Ganau sets a benchmark for cork production, from the sustainable management of cork forests to meticulous deep-cleaning protocols.

FAMILY OF CORK
Premium Closures for Every Need

PURE

Natural cork stoppers redefine the traditional wine closure, embodying the highest standards of **quality and simplicity**.

EPIQ CLASSIC CLASSIC PLUS

PERLAGE

Each of these closures offers **excellent organoleptic performance and superior pressure resistance**, ensuring a perfect seal for **sparkling and semi-sparkling wines**.

CLASSIC 0+2 UNIQ PRIMO PRIMO PLUS PHÉNIX

TECH

A line of closures **for still wines**, made from **agglomerated micro-granules** of cork, offering a **valid alternative to traditional natural cork closures**.
