ASSEMBLY AND KITTING

High-touch assembly engineered for premium presentation, accuracy, and brand consistency.

FASTER TOGETHER

PGS360's assembly network operates as one unified system, with consistent processes and quality standards across every facility. By distributing projects across multiple sites, we increase capacity, accelerate production, and ensure reliable, brand-ready execution even during high-demand periods.

FREIGHT AND TRANSPORTATION

PGS360 operates a fully integrated transportation network that links all facilities through strategic routing, real-time visibility, and coast to coast coverage. Our teams manage the full movement of goods from ports and manufacturers to retailers and distribution centers, ensuring speed, consistency, and compliance at every step.

CORE CAPABILITIES

TL, LTL, air freight, and expedited services

Cross-dock, port drayage, and inbound port pickups

Hazmat-ready transport for aerosols, oxidizers, and flammables

Dedicated inter-facility transfers across CA, TX, and NJ

Strict controls ensure only authorized carriers handle shipments.

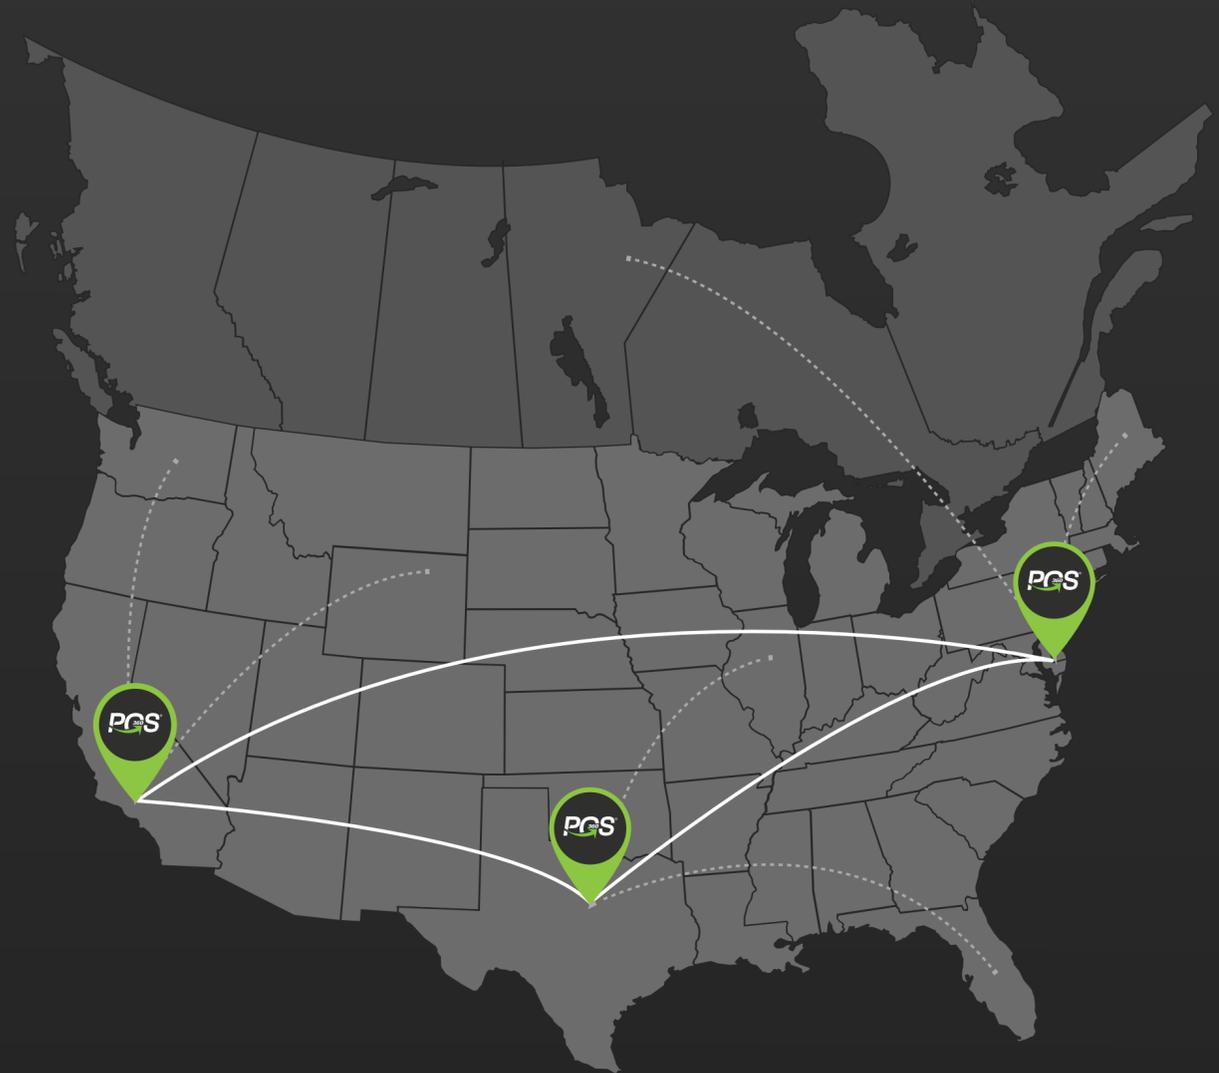

Optional GPS tracking for TL shipments at no additional cost.

Vetted carriers ensuring secure, reliable delivery.

White glove handling for high-value or sensitive shipments.

CORE LANES
TL and LTL providing just-in-time solutions connecting SoCal with Midwest, South, South East and North East.

WHAT OUR PARTNERS SAY

"PGS360 has truly gone above and beyond to meet our deadlines this year, even on short notice. We greatly appreciate your partnership and look forward to a successful year together."

PHLUR

New Jersey

"PGS360 has helped us scale assembly projects efficiently while keeping transportation on schedule. Their communication, flexibility, and execution give us confidence from start to finish."

OUAI

Texas

"The team's quick and expeditious response, along with their clear communication, made everything run smoothly for our B2B operation. We truly appreciate the partnership."

Bloom

Texas

"The team at PGS is very attentive. We receive white-glove service when it comes to communication."

POWERED BY TECHNOLOGY

EFFICIENCY POWERED BY INTEGRATION

PGS360 operates on a powerful in-house-built software system that centralizes inventory, orders, and workflows across all facilities. This unified platform supports accurate processing, faster operations, and consistent control, giving teams real-time visibility and dependable performance at every step.

Seamless Integration

Real-time sync with ERPs, ecommerce platforms, and EDI providers

Automation-Driven Fulfillment

WMS capable of zone picking, optimized putaway logic, bulk picks, picking route optimization and more.

Custom-built systems

Designed for optimized workflows, order accuracy, and operational efficiency.

Full inventory visibility

Real-time inventory visibility by SKU, lot, batch and location

PARTNERSHIP PATHWAY

Step
1 | **Discovery
& Analysis**

Historical shipment data is analyzed to identify opportunities to save time and reduce costs.

Step
2 | **Systems
Integrations**

Systems are aligned through API and EDI to ensure seamless communication and retailer-compliant transactions.

Step
3 | **Oboarding
& Testing**

Inventory is onboarded and validated through end-to-end B2B and DTC testing.

Step
4 | **Go Live**

Operational launch with monitored execution and ongoing support.

HASSLE-FREE ONBOARDING

Transportation handles the heavy lifting of the inbound move, Fulfillment manages operational planning and day-to-day execution, and Assembly supports hands-on needs such as sorting, relabeling, and rework. Together, they create a coordinated, smooth transition for a successful launch.
