Mac and Windows systems**

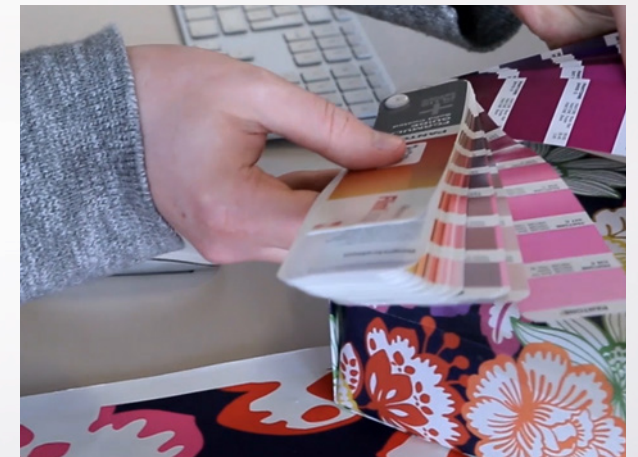

**Modern workflow software for
efficient data processing**

**Color management solutions for
maximum color accuracy on all
materials**

Checking, processing, and approval of art-work data in close coordination with our customers

Certifications

The mark of responsible forestry

JUNG was FSC®-certified in 2010. This certification demonstrates our commitment to comply with the objectives of the Forest Stewardship Council®.

Blue Angel Papers are made from 100 % waste paper stock, which is particularly ecologically sound. (RAL Certification-Nr. 29200, 29126)

JUNG runs on green power. We source our electricity from European hydroelectric plants.

JUNG Verpackungen GmbH was awarded a silver medal in recognition of its EcoVadis CSR rating.

The wrapping and Christmas papers in the JUNG Design collection are produced in a climate-neutral way. To this end, we offset the CO₂ emissions generated during production via the NatureOffice organization.

As a family-run company in its 2nd generation, we won the prestigious Druck&Medien Award in the category "Packaging Printer of the Year" in recognition of our outstanding print quality. We took second place as "Family-run printing company of the year".

DFTA represents over 300 mainly medium-sized member companies of the flexoprint industry.

JUNG has been ISO-certified in 2019. Certification-Nr. GM3020

JUNG has successfully passed the SEDEX Members Ethical Trade Audit and received the SMETA certification. The Ethical Trading Initiative (ETI) certifies that JUNG acts in an ethical way.

Transparency One is a web-based system that helps companies improve transparency along their supply chain. The system enables companies to create transparency and increase consumer confidence in their products.

QIMA is a leading global organisation specialising in quality control and compliance audits. It provides services to companies worldwide to ensure that their products and systems meet the highest standards. QIMA certification is proof that a company is excelling in terms of quality assurance, safety, ethics and sustainability.

Sustainability

As a family-owned company in the second generation, sustainability has always been at the core of our corporate philosophy. For us, this means operating responsibly, ensuring ecological sustainability, and promoting social justice.

Every year, we publish the JUNG Sustainability Report.

In the JUNG Code of Ethics and Supplier Code of Conduct,

we commit ourselves and our suppliers to responsible business practices.

The JUNG Design Collection is produced climate-neutrally.

We offset the CO₂ emissions generated during production through the renowned organization **NatureOffice**.

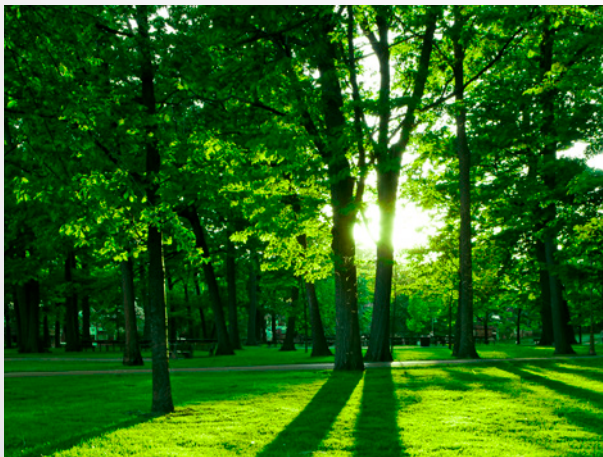

We are certified multiple times under ESG standards:

- ECOVADIS Silver Medal
- Sedex SMETA
- QIMA

We meet the requirements of the EUDR.
